## – The DE1 Reconfiguration Sciences in Overview

*In this online self-study course, we continue with the Reconfiguration Work. The aim is to understand the work under Principle 7, and how the Correct Commitment apply to the work, as well as the mechanics and dynamics of the HOPE DE1 Reconfiguration work. In this course, we get the overview of the DE1 Reconfiguration Work.*

*It is expected that the HAL Academy Progression Sciences are completed since the concepts presented here build upon the foundational understanding of the work within the Pillar 1-7, and thus the mastery of the Principles, the Rules of Engagement, and the Laws of Energy – or at least the conceptual understanding of these. All the courses can be found on the HAL Academy Website [www.toveje.dk](http://www.toveje.dk)*

#### *The 12 Principles of Consciousness Progression*

The Principles are the building blocks that enable us to build a higher awareness structure. The Principles, and the way they work in each and one of us, are based upon the original skills to be re-developed in the attempt to reboot our energy system, so we yet again can follow the original guidelines of the progressive systems.

#### *The 12 Natural Laws of Energy Utilization*

The Natural Laws of Energy determine if the energies, we utilize in our energy system, will lead to progression or regression. When the energies are utilized correctly, we are allowed to reconnect to the reality holographic grids, and more energy will flow into our energy system via the base field and the organic holographic grid structure in the DE2. When utilized wrongly, the grids close – step by step – until there is nothing left but regression and distortion.

The in-depth work with the Principles and the Laws is explained in the HAL Transition & Progression Sciences.

#### *The Correct Commitment is Key to Any Progress (Principle 7) – theme for the year 2023*

This Principle governs the ambitions of what we commit to in life, energetically and physically. All we have learned from the previous Principles should at this point be a natural part of the energetic influential sphere the heart field produces, fueling our brain field to perceive the realities, we need to see to do our work. Based upon this information, using the Principles, the Rules and the Laws, the decisions can be made as in what to do, where to go and what to choose to go all-in to get the highest progression rate.

#### ***The Law of Cause and Effect (Law 7)***

**The 7<sup>th</sup> Principle can be understood as psychological processes and processes of consciousness progression.**

**The 7<sup>th</sup> Law of Cause and Effect is trickier because here we work with the energetic laws of the Outer Domain as well as the energetic laws of the grand cycles.**

### **The Different Domains and Races**

*Outer domain or density 1 races (ODDE1) live and evolve under the guidance of the Principles, Rules of Engagement and Laws in very dense realities. Since we have become an ODDE1 human, we now understand that in this world, we now are part of, we are here to clear out, change, and undo our code streams, consciousness units and accomplished energy systems within worlds engineered for this purpose of undoing, unbecoming, and deconstruction of what have come into existence within the cycles as part of the inner and middle domains.*

*The outer domains, and the worlds being fostered from these, were once engineered for the purpose of transformation, transmutation, and transcendence. Here the original ODDE1 races could follow the cycles of undoing, unbecoming, and deconstruction, the outer domain density 1 energy systems, with the altered and upgraded consciousness units, shed off their ODDE1 holographic-organic vessels and return to the middle domain density 2 reality fields from where they resume their progression work as MDDE2 races. The goal of the progression work in the ODDE1 realities is to achieve the highest purity rate, and learning to integrate, follow and unfold the highest standards of existence.*

### **Not Explained – Most are Explained on this Level in the HAL Progression Sciences Pillar 1-7**

Middle domain or density 2 races (MDDE2) work with the systemic-energetic versions of the progression dynamics, following the middle domain version of the Principles, Rules, and Laws. The goal is to unfold their consciousness units to the highest complexity and possibility rate (the highest progression rate) within the MDDE2 reality fields, using complex holographic-organic forms based upon highly advanced energy systems composed of concentric circles of vibrational energy imbued with code sequences built up of radiation energy units.

Inner domain or density 3 races (IDDE3) work with the schematic-energetic versions of the progression dynamics, following the inner domain version of the Principles, Rules, and Laws. The goal is to refine their consciousness units to the highest complexity and possibility rate (the highest consciousness expression) within the IDDE3 reality fields, using multifaceted holographic-energetic forms based upon highly advanced energy systems composed of holographic-energetic code sequences built upon radiation energy units alone.

Core domain or density 4 races (CDDE4) are called completed or full human races, and they work with the universal principles or the central sun itself, unfolding its hidden energies in the 12<sup>th</sup> to infinite lesser cycles, altering the triadic template in full to become a sphere of principles, high potential consciousness, and high potential energy of the universal cycles.

Now, there are also rules amongst universes and what type of evolution that unfolds there. This sector, including our universe, is what is called ancient racial lineages going back to the Ancient Ones but there are other human races out there, which are further back in their evolutions, the so-called 3<sup>rd</sup> cycle, where the spatial properties of space and forms are developed, as well as the 4<sup>th</sup> cycles, where the triadic forms turn into manifest forms.

*The higher order energy systems and the organic vessel with its three lower fields:*

**Higher Order Energy System – the True Human; Progressive**

Consciousness units  
Code sheets, configuration, and template  
6D Energy system fitting the original solar system

**Lower Order Fields – the False Human; Regressive**

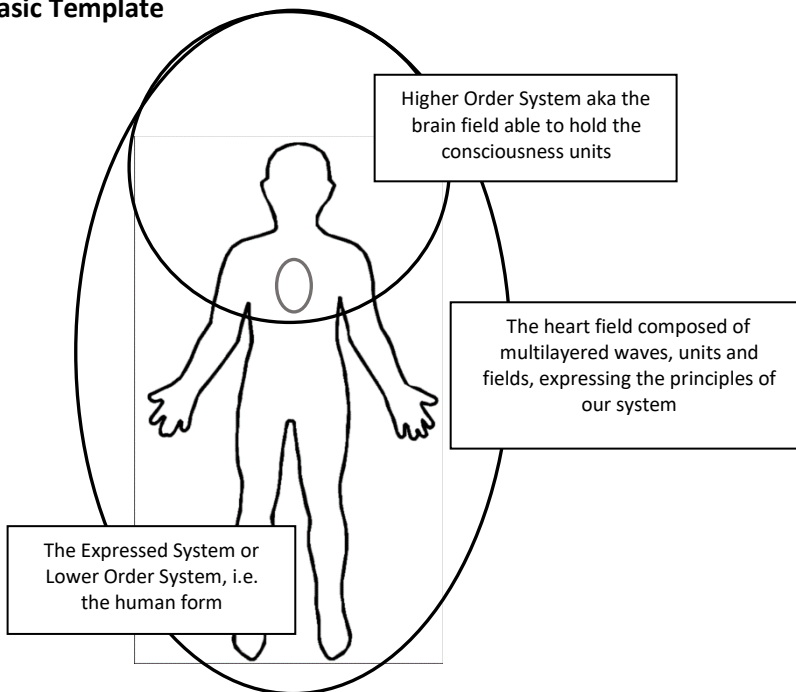

Mind-field to be altered into the 5<sup>th</sup> cycle brain field  
Emotional field to be altered into the 4<sup>th</sup> cycle heart field  
Bio-frequency field to be altered into the 4-5<sup>th</sup> cycle bio-density field

**Organic form – Molecular**

Bio-frequency matter is to be cleared and transformed by our activation of the higher order energy system, and then returned into density units, so far as it is possible, following the original ODDE1 settings.

**The Basic Template**

*The consciousness units are expressed as potentials and as developed and unfolded using units, waves, or fields. The developed consciousness is expressed via the holographic-organic genetics carrying the memories of other systems and what the higher order system has recorded there, through the forms and vessels it has had. The full functional brain and its field unfolds this, when it has learned to access the multilayered realities of our system. The energy system carries potential energy from this universe and the utilized and expressed energy from other universes. The full functional heart, and its units, waves, and fields, unfolds this, when it has learned to access the multilayered realities of our system. The expressed form is the conglomerate of all of this, and the tool to add more energy to the existing energy system and consciousness units, waves, and fields.*

**When we begin this work the potentials look like this**

The brain field is not there due to the non-functionality of the brain and the heart field is barely active; it is active enough to keep us alive using the higher order energies in the core field. The core field in the heart is connected to the higher ordered energies but most of the heart functions run on frequencies. The brain is only operating on frequencies and have no access to the higher order multilayered energies.

Instead of using the higher ordered energy system, people are soaked in the distortion fields, which arise from the overuse of emotional and mental energies.

### The Mind-field and the Emotional Field aka the Distortion Fields

*The distortion fields prevent the higher ordered energy system and holographic-organic genetics from being expressed into this human form.*

The distortion fields are closely connected to the personality and all that we have experienced in this lifetime. These two fields are an effect of the processes in the brain and heart energies, and arise from the neuro synaptic response mechanics and feedback systems in the brain and central nervous system (the CNS) as well as electro-chemical transmitter response systems from the glands, and the heart and periphery nervous system (PNS).

# The HOPE DE1 Work Course 2

## – The DE1 Reconfiguration Sciences in Overview

The two systems, the heart and the PNS and the brain and the CNS, are the two main systems in us generating the energies that are emitted as the distortion fields. All the psychological and mental processes in us, the inner human and personality, are low ordered energy utilization and they generate a lot of energies, which in this work stand in the way for the true potentials in us and thus need to be cleared out.

Thus, the work also implies the work with the personality and the use of emotional and mental energies, and how we can clear these out and lift them into a clear, permeable state, from which the higher ordered energies can attach and transform the personality.

This work, the clearing work, and the ability to reconnect to the higher potentials in us, is called the integration work.

The Projection Field is accessed by using energy from heart field building the brain field

The created Upper Triangle and Main Center control the brain and CNS, when the density energies are activated and built. Then it is possible to work with the 5<sup>th</sup> dimension and up.

The Heart Field, via the heart vortex, control the PNS and the middle energetic level of the energy system from the 4<sup>th</sup> dimension and up.

The Base Level of the TP shows the lowest energetic level of the energy system.

#### The Projection Field:

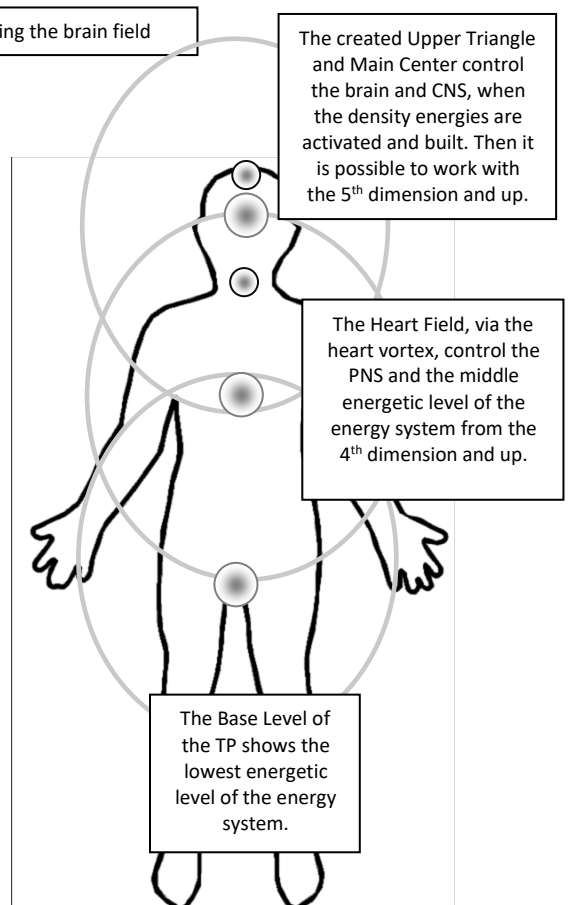

The Inner Domain density 3 (IDDE3) consciousness genetics hold the imprints of what and who we used to be, here or elsewhere. These are mirrored into the projection field, behind the brain, when the higher energies of the heart field are activated. The main center and upper triangle can be created to work with this level.

#### The Heart Field:

The Middle Domain density 2 (MDDE2) level is administered by the heart field. The heart field can be accessed via the constructed heart vortex. Otherwise, it runs on frequencies and emotional energy, and only expresses human emotions. It is not able to sense energy as it was supposed to do (the true function).

#### The Bio-Field:

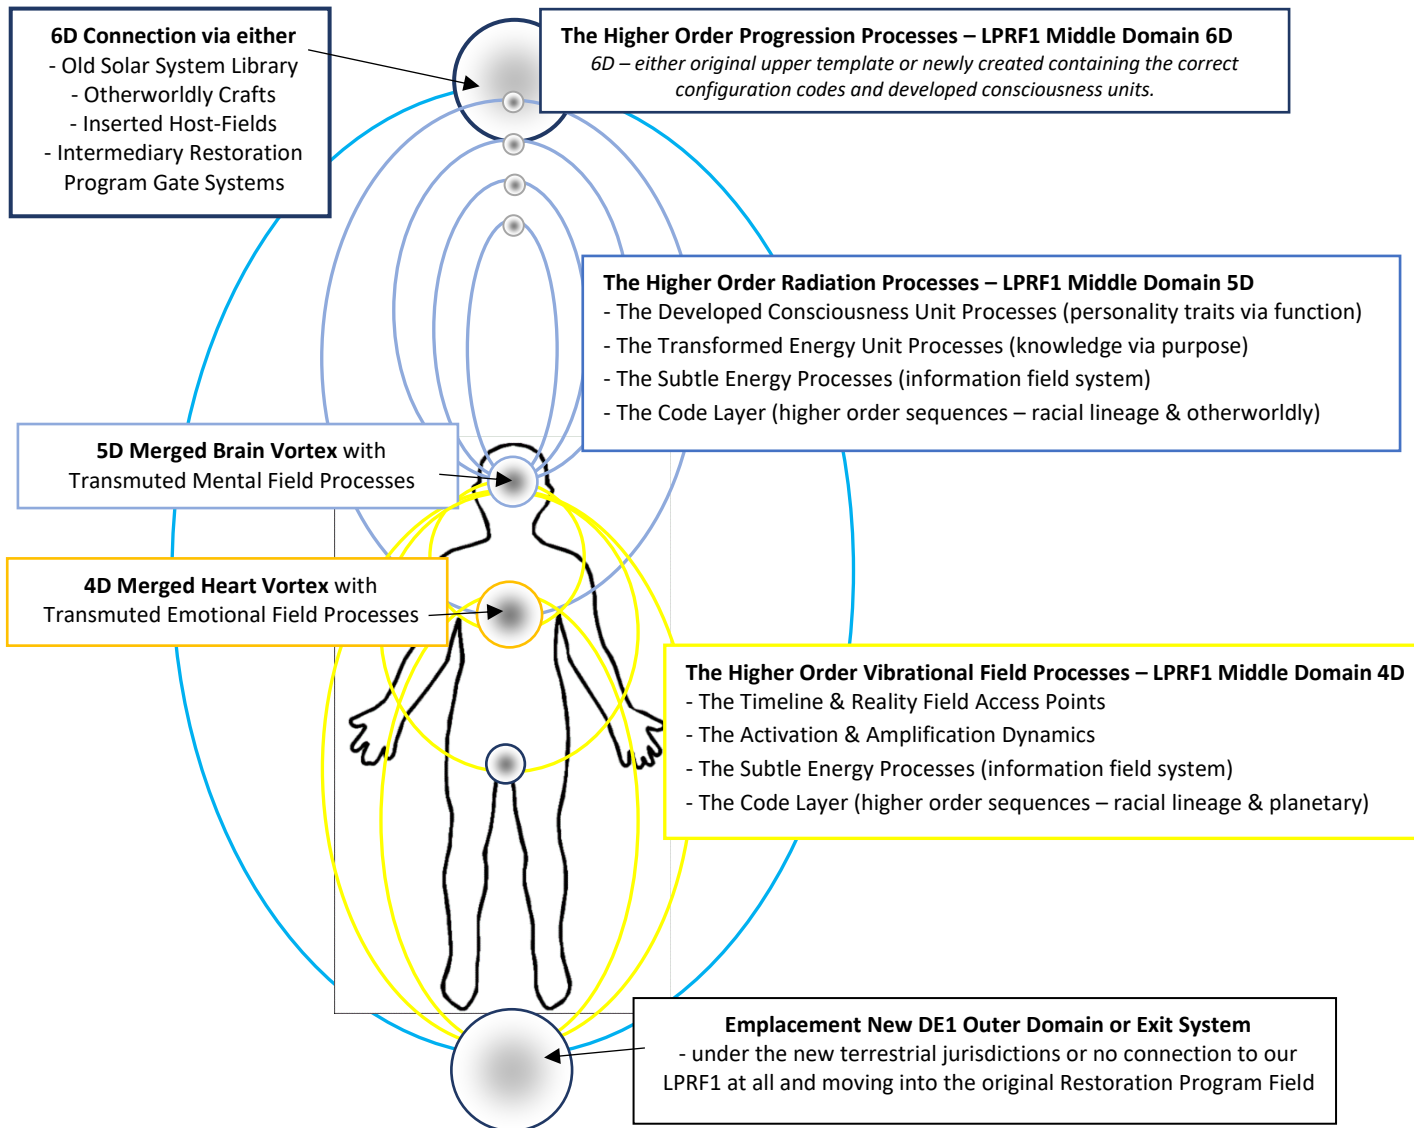

The Outer Domain density 1 (ODDE1) bio-field has been adapted to match the electromagnetic fields and molecular particles composing the body. The bio-field today holds frequency scalar fields, 4D artificial reality codes, inserted alien holographic overlay codes, inserted old or newer alien DNA alteration codes and, to some degree, the releasement codes from the Restoration Program.

### *The Higher Order Transformative Energy System in the Outer Domain DE1*

*The higher order energy system can be viewed as multilayered composition of several energy fields with different access points, energetic orientation and processes of consciousness and energy. It expands from the personal experiences into the reality fields of similar forms of energy fields and consciousness processes.*

*The higher order energy system is thus a composition of the processes of raw consciousness and energy units to be developed and already transmuted consciousness units (the CUs) and energy units. The goal of these processes is to develop new forms of existence.*

#### **The Merged Lower Order Brain & Higher Order Radiation Processes**

Transmuted Neuro-Electric Processes (biological and otherworldly) into expressing the functional CUs adapted to ego structure.  
 Transmuted Neuro-Chemical Processes (biological and otherworldly) into expressing the lower and higher order knowledge.  
 Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.  
 Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.

#### **The Merged Lower Order Emotional & Higher Order Vibration Processes**

Transmuted Electro-Chemical Processes (biological and otherworldly) into incorporating timeline & reality field dynamics.  
 Transmuted Nervous System Sensations (biological and otherworldly) into incorporating activation & amplification dynamics.  
 Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.  
 Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.
