– The DE1 Reconfiguration of the YX & XX Energy Systems

In this online self-study course, we continue with the Reconfiguration Work. The aim is to understand the work with the mechanics and dynamics of the Reconfiguration work. In this course, we continue with the Sciences of the Reconfiguration and how these apply to the mechanics and dynamics of the outer domain, seen from the angle of the female and male energy systems and how they differ in the inner work.

It is expected that the HAL Academy Progression Sciences are completed since the concepts presented here build upon the foundational understanding of the work within the Pillar 1-7, and thus the mastery of the Principles, the Rules of Engagement, and the Laws of Energy – or at least the conceptual understanding of these.

Podcast 1: The Different Domains and Races

Outer domain or density 1 races (ODDE1) live and evolve under the guidance of the Principles, Rules of Engagement and Laws in very dense realities, from where they can clear out, change, and undo their code streams, consciousness units and accomplished energy systems within worlds engineered for this purpose of undoing, unbecoming, and deconstruction of what have come into existence within the cycles as part of the inner and middle domains.

The outer domains, and their worlds, are engineered for the purpose of transformation, transmutation, and transcendence. Following the cycles of undoing, unbecoming, and deconstruction, the outer domain density 1 energy systems, with the altered and upgraded consciousness units, shed off their ODDE1 holographic-organic vessels and return to the middle domain density 2 reality fields from where they resume their progression work as MDDE2 races. The goal of the progression work in the ODDE1 realities is to achieve the highest purity rate, following the highest standards of existence.

Middle domain or density 2 races (MDDE2) work with the systemic-energetic versions of the progression dynamics, following the middle domain version of the Principles, Rules, and Laws. The goal is to unfold their consciousness units to the highest complexity and possibility rate (the highest progression rate) within the MDDE2 reality fields, using complex holographic-organic forms based upon highly advanced energy systems composed of concentric circles of vibrational energy imbued with code sequences built up of radiation energy units.

Inner domain or density 3 races (IDDE3) work with the schematic-energetic versions of the progression dynamics, following the inner domain version of the Principles, Rules, and Laws. The goal is to refine their consciousness units to the highest complexity and possibility rate (the highest consciousness expression) within the IDDE3 reality fields, using multifaceted holographic-energetic forms based upon highly advanced energy systems composed of holographic-energetic code sequences built upon radiation energy units alone.

Core domain or density 4 races (CDDE4) are called completed or full human races, and they work with the universal principles or the central sun itself, unfolding its hidden energies in the 12th to infinite lesser cycles, altering the triadic template in full to become a sphere of principles, high potential consciousness, and high potential energy of the universal cycles.

The higher order energy systems and the organic vessel with its three lower fields:

Higher Order Energy System – the True Human; Progressive

Consciousness units

Code sheets, configuration, and template

6D Energy system fitting the original solar system

Lower Order Fields – the False Human; Regressive

Mind-field to be altered into the 5th cycle brain field

Emotional field to be altered into the 4th cycle heart field

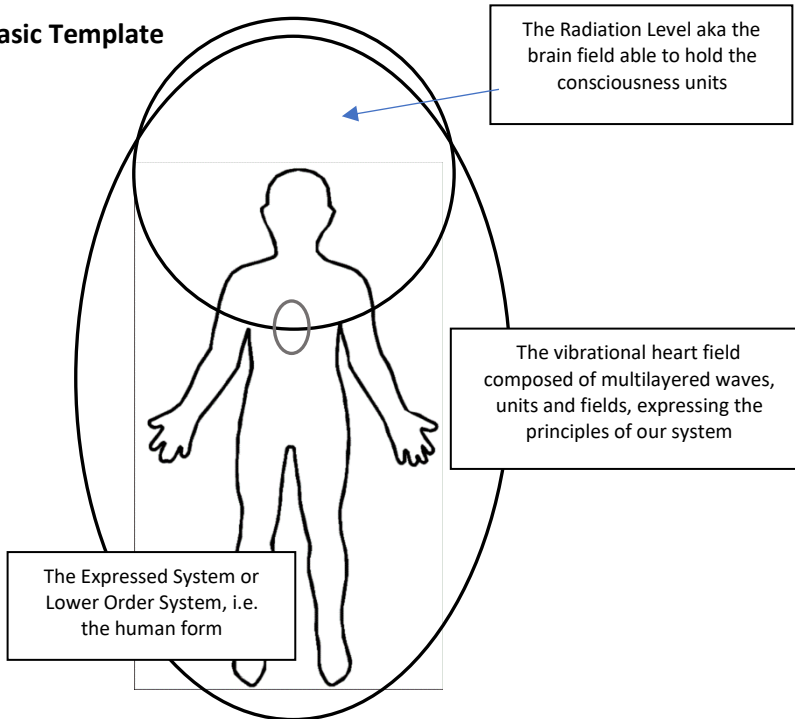

Bio-frequency field to be altered into the 4-5th cycle bio-density field

Organic form – Molecular

Bio-frequency matter is to be cleared and transformed by our activation of the higher order energy system, and then returned into density units, so far as it is possible, following the original ODDE1 settings.

The Basic Template

The consciousness units are expressed as potentials and as developed and unfolded using units, waves, or fields. The developed consciousness is expressed via the holographic-organic genetics carrying the memories of other systems and what the higher order system has recorded there, through the forms and vessels it has had. The full functional brain and its field unfolds this, when it has learned to access the multilayered realities of our system. The energy system carries potential energy from this universe and the utilized and expressed energies from other universes. The full functional heart, and its units, waves and fields, unfolds this, when it has learned to access the multilayered realities of our system. The expressed form is the conglomerate of all of this, and the tool to add more energy to the existing energy system and consciousness units, waves, and fields.

The Construction of a Cell (DE1)

(Bio Regenesis & Dynamics Podcast 2)

The perimeter of emotional energies holds at least 9 levels of distortion to be worked with, all depending on the lower field blueprint:

1. Unconscious electrochemical processes.
2. Subconscious level; fantasies – dreams.
3. Collective consciousness field; archetypes – entities.
4. Lower astral material; the residual levels of the past.
5. Parasitic level; TEGs and subsequent energy patterns.
6. Astral entities and elementals (DE2 fragments).
7. The world corners; huge entities with DE2 traits.
8. The visitor areas under the regressed DE2.
9. DE2 network attached to the artificial 4D programs.

The bio-field behind the cell is made of the destroyed DE1 network, with its now infected, contaminated, and distorted energies and genetic fragments (the holographic blueprint of the cell) and on top of that is added the distorted emotional and mental fields composed of distorted energies from the inserted DE2 and DE3 networks.

The core of mental energies and holds at least 7 levels of distortion to be worked with, all depending on the lower field blueprint:

1. Human thought forms and belief systems.
2. Regressed DE2 energy patterns with mental energy.
3. Lower timeline level; bugs and residuals from the past.
4. Lower DE3 insertions and interception holographic content.
5. Field of infected DE3 fragments – 3rd cycle.
6. Lesser infected DE3 clusters from the Timeline Event in the upper frequency bands of the mental plane.
7. Infected DE3 network bridging into the artificial 5D programs.

The energetic perimeter of the cell is connected to the identical layers of the emotional field and the identical layers in a chakra. However, these layers depend on the lower field blueprint. So, what is that blueprint?

The Fetal Pattern (not the bio-field code layers):

1. The merged lower energy fields of the parents lay the blueprint of the 3 lower fields.
2. Then, the 3-field blueprint is coded by the circulating energetic coding from the past life lower fields.
3. The past life codes regulate the cellular blueprint and the content of the emotional and mental fields.
4. The code layers from the past lives also determine the type of genetic fragments in the 3 lower fields.
5. The emotional layer unfolds the coding from the past lives into patterns by drawing in distortion energies from the racial grids and DE2 networks. This also generate the perimeter of the cells.
6. These levels hold the energetic interaction potentials in the energetic patterns in both the mind-field and the emotional field. The energetic patterns in both fields are controlled by the content of the distortion fields and subsequent remaining technologies from the DE2 network.
7. These layers also determine the possibility rate of progression.

Bio Regeneration & Dynamics Podcast 3-4: The lower order energy system is a composition of the mental and emotional field processes, experienced via inner sensations and thought processes, and transformed into constructions defining self, others, and reality.

The Lower Order Energy System & Epigenetic Processes

Two forms of energetic processes:

The lower order energy system can be worked with via three access points, from which we can access the different processes:

1. The Mid-Brain Access Point gives access to the mental field and its four layered processes, in combination with the Throat and Solar Plexus Access Points.
2. The Throat Access Point gives access to the “expression mechanism” of our psyche – it is our voice and the place where the inner and outer human processes can be expressed.
3. The Solar Plexus Access Point gives access to the “sensation mechanism” of our psyche – it is the process unit of the emotional and mental field kinetic processes.

Consequently, when we work with the emotional field we work with its energetic levels, the constructed energy patterns, and the material these are made of.

We can divide these into 4 sections of work, from the outside and in. Number 4 is the outer bio-energetic processes and number 1 is the inner core fields – here in more detail than on the illustration above:

4. The electrochemical processes generated by the organs, glands, and cells.
3. The nervous system sensations (subtle electrochemical) generated by the PNS.
2. The even more subtle psychic-energetic information levels of which there are 9 (8).
1. The code layer in the lower order sequences connected to the same levels in the reality field.

Podcast 9: Summing Up the Reconfiguration Work pages 9-11

The brain field is not there yet due to the lack of density structural layers and the heart field is barely active; it is active enough to keep us alive using the higher order energies in the core field. The core field of the heart is connected to the higher ordered energies but the physical heart runs on frequencies. The brain is also operating within the frequency spectrum and have no access to the higher order multilayered energies.

Instead of using the higher ordered energy system, people are soaked in the distortion fields, which arise from the emotional and mental energies.

The Mind-field and the Emotional Field aka the Distortion Fields

The distortion fields prevent the higher order energy system and holographic-organic genetics from being expressed into this human form.

The distortion fields are closely connected to the personality and all that we have experienced in this lifetime. These two fields are an effect of the processes in the brain and heart energies, and arise from the neuro synaptic response mechanics and feedback systems in the brain and central nervous system (the CNS) as well as electro-chemical transmitter response systems from the glands, and the heart and periphery nervous system (PNS).

The HOPE DE1 Reconfiguration Work Course 3

– The DE1 Reconfiguration of the YX & XX Energy Systems

The two systems, the heart and the PNS and the brain and the CNS, are the two main systems in us generating the energies that are emitted as the distortion fields. All the psychological and mental processes in us, the inner human and personality, are low ordered energy utilization and they generate a lot of energies, which in this work stand in the way for the true potentials in us and thus need to be cleared out.

Thus, the work also involves the personality and the use of emotional and mental energies, and how we can clear these out and lift them into a clear, permeable state, from which the higher ordered energies can attach and transform the personality.

The clearing work and the ability to reconnect to the higher potentials in us, and from that begin the integration of these potentials, is called the integration work.

The Projection Field is accessed by using energy from heart field building the brain field

The Projection Field:

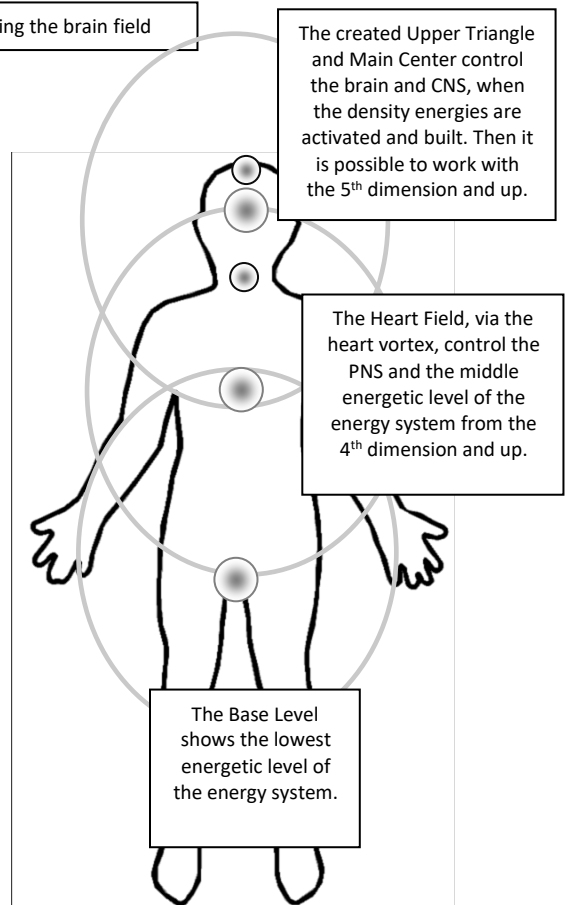

The Inner Domain (IDDE3) consciousness genetics hold the imprints of what and who we used to be, here or elsewhere. These are mirrored into the projection field, behind the brain, when the higher energies of the heart field are activated. The main center and upper triangle can be created to work with this level.

The Heart Field:

The Middle Domain (MDDE2) level is administered by the heart field. The heart field can be accessed via the constructed heart vortex. Otherwise, it runs on frequencies and emotional energy, and only expresses human emotions. It is not able to sense energy as it was supposed to do (the true function).

The Bio-Field:

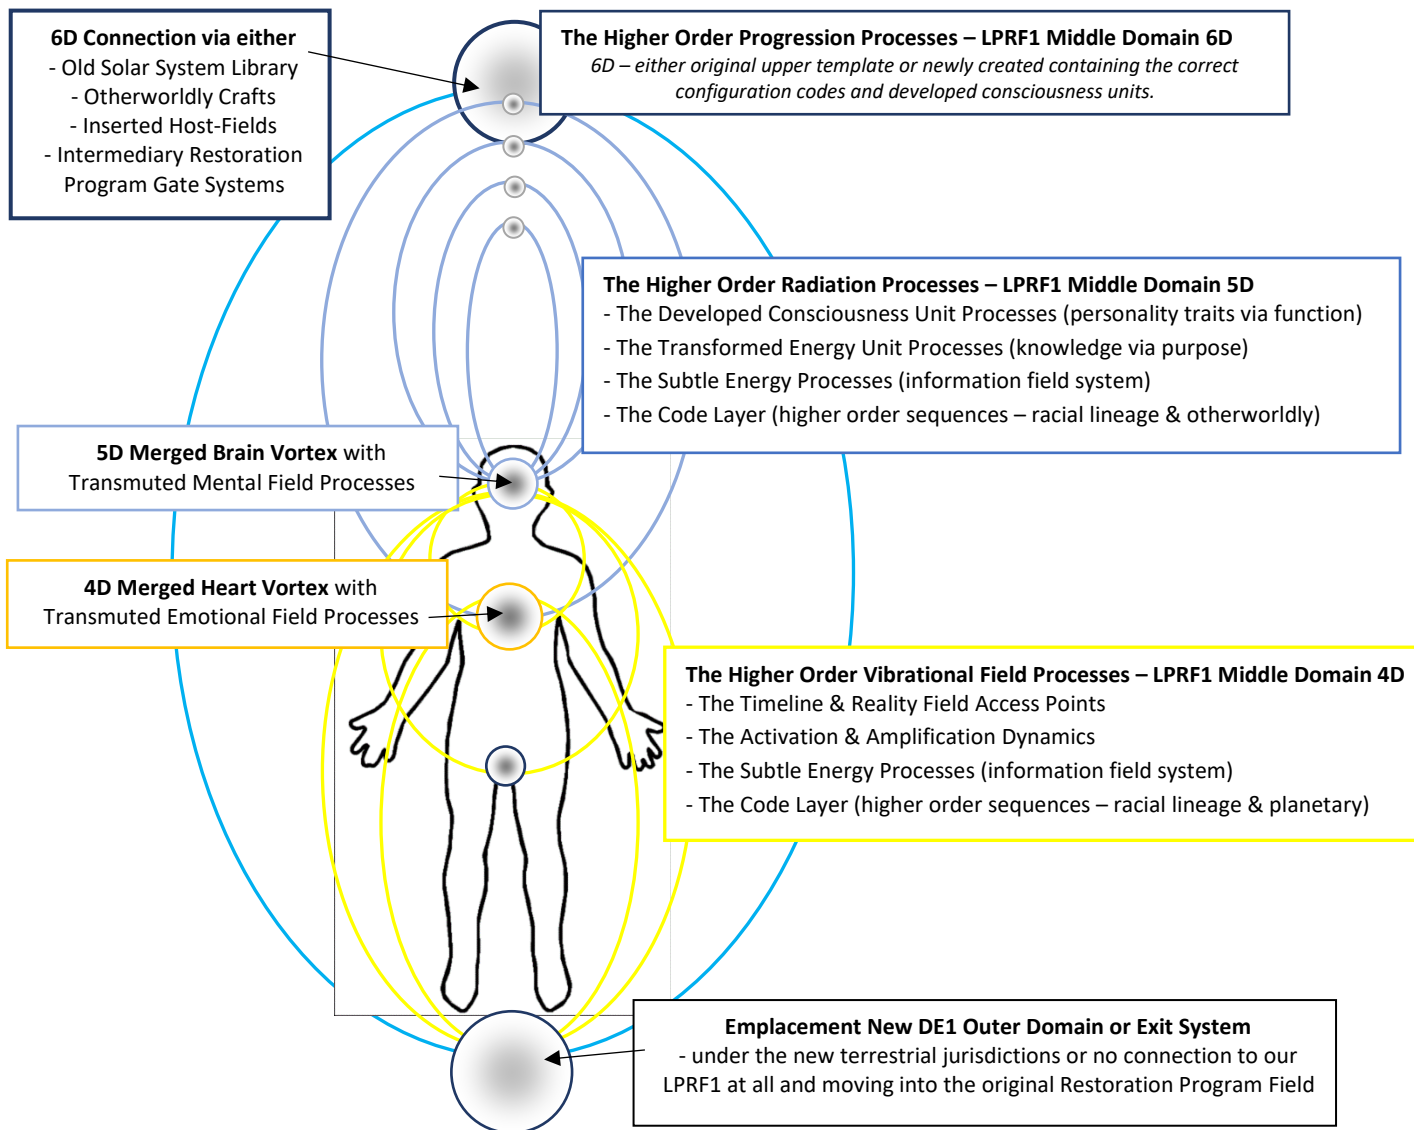

The Outer Domain (ODDE1) bio-field has been adapted to match the electromagnetic fields and molecular particles composing the body. The bio-field today holds frequency scalar fields, 4D artificial reality codes, inserted alien holographic overlay codes, inserted old or newer alien DNA alteration codes and, to some degree, the releasement codes from the Restoration Program.

The Higher Order Transformative Energy System in the Outer Domain DE1

The higher order energy system can be viewed as multilayered composition of several energy fields with different access points, energetic orientation and processes of consciousness and energy. It expands from the personal experiences into the reality fields of similar forms of energy fields and consciousness processes.

The higher order energy system is thus a composition of the processes of raw consciousness and energy units to be developed and already transmuted consciousness units (the CUs) and energy units. The goal of these processes is to develop new forms of existence.

The Merged Lower Order Brain & Higher Order Radiation Processes

Transmuted Neuro-Electric Processes (biological and otherworldly) into expressing the functional CUs adapted to ego structure.
 Transmuted Neuro-Chemical Processes (biological and otherworldly) into expressing the lower and higher order knowledge.
 Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.
 Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.

The Merged Lower Order Emotional & Higher Order Vibration Processes

Transmuted Electro-Chemical Processes (biological and otherworldly) into incorporating timeline & reality field dynamics.
 Transmuted Nervous System Sensations (biological and otherworldly) into incorporating activation & amplification dynamics.
 Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.
 Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.
