

On the Pleiadian-Sirian Connection

The HAL Books by Randi Green used as supporting information in this article

- 1) Souls of Humanity (about the Regressed Races and OWO – the latest rounds of modification done to us).
- 2) Reconstruction of the Planetary Soul (the fall of the 2nd cycle mammal-avian races ATE)
- 3) Terralogy (activating the OWO regressed genetics, aka the Settlers or the “Deva Evolution”).
- 4) Modern History (explaining the failed developmental programs to undo the timeline event effects).
- 5) The HAL Philosophy Book (explaining the Pillar Project & the HM ideologies).

On the Original Er´Th

As the NGC Activation and Clean-up Cycles work their way through the collective holographic networks of our reality and the alien inserted alteration networks are removed and disconnected from the racial grids, our planet will move back into its original racial grid and network settings following the original Er´Th.

Explainer

Gridworks, or racial grids, are connected to the bio-matter and all organic lifeforms. They uphold the code sheets (or sheaths) running the energy system of the organic bio-forms present in that system. The racial grids date back to the original 12 universal lineages in the Pillar Project aka the original Solar System Project and its true humanities working here to create new developmental programs for continued progression.

As the timeline event hit our system, the Pillar Project workstations were altered to find a way to undo the effects of the timeline event. Later on, it became a sector for the infected and a drop-zone.

Networks, or planetary information networks (the PINs), are connected to the holographic foundational setup and programs upholding and running a reality field. It is via the networks that different forms of developmental programs can be inserted. The developmental programs run what is called the holographic teaching system and guidelines of what to achieve in that reality field. The developmental programs are governing a reality field, along with the Councils. Other types of technology are also linked to the networks.

By taking over the networks, and insert alien technology (AIT – alien invasion technology) it is possible to hijack a planet and its population, simply by takeover and alter their planetary information networks. This is often done by infiltration and covert alignments with some of the inhabitants of that reality field beforehand to get access to the core facilities (described in the HAL Philosophy book). And then by a constant renewal of these ancient contracts and concords to remain active within that reality.

Now what does that mean?

For starters, we must understand the original purpose of our planet, earth. Originally it was called Er´Th and it was mostly run as a Pleiadian workstation under the Pillar Project and their science stations. We were allowed to be here due to arrangements done with the Ancient Ones, and to work within their construction, aka our Solar System, which they had engineered in a previous universal cycle. When we came it had been dormant for a while due to its location in the outskirts of the 12 universes.

The HAL Project Advanced Articles

Article 2 September 2021

We are talking about before the timeline event (BTE) true human races of which there were three main groups present in our system; the Sirian humanoids, the Pleiadeans true human-humanoids and the Lyran-Vega true humans. The Vega-Sirian lineages later on descended into the Nibiruians due to hybridization. In other parts of the 11 parallel universes, housing the original 12 universal lineages, other true human and humanoids existed and still do.

The inner workstations were circling around, at the time called primary emission sun, working with the transformation-transmutation of energy into higher states of manifestation, while the second absorbing cold sun in our system was Jupiter and it had its own workstations cycling around it (today seen as “moons”). On the Jovian workstations they worked with reconstruction and deconstruction of energy amongst other higher order sciences very unknown to us.

Then, we had Mars, housing the human and humanoid races working on the inner workstations in our Solar System, i.e., the headquarter. The Moon had not arrived yet, and Venus was the transit station in and out of the inner circles connected to the Vega-Sirian system. Mars had bridges too but they linked up to a parallel system with another type of humanoid-avian races. Er´Th housed the gate systems to the original Pleiadian system. Of course, there is more information to all of this but it will suffice for this article.

After the timeline event (ATE) things changed. The races within our system changed and Er´Th, from being a workstation in which lesser organic lifeforms were engineered to be seeded into other reality fields (a nursery), it became the main workstation to undo the effects of the timeline event. In the hijacking, closer to our time, Mars fell to the scavengers and were taken over first, then came Venus and finally Er´Th was taken over. Everything was altered.

What is important to derive here, is the original purpose of our planet, which explains a lot. Did the hijackers go after Mars? No. But it was the entry point into our Solar System from the parallel systems holding regressed races. Did they go after Venus? No, but it was a good planet to have due to its connections to Vega and Sirius, and the hijackers went to these places from Venus. And then they took over the nursery to begin their regensis programs here, altering developmental programs, lifeforms etc. to fit their plans and projects of survival.

As the NGC resets everything to default and works it way back in time, the next phase of our planetary activation and cleanup is the phase where our planet, under the Sirian Solar Rishis and the original white elder Pleadian races, functioned as a place to undo the effects of the timeline event and what happened to our template, energy system and genetic compositions (also described in *the Souls of Humanity*).

The ATE Pleiadian-Sirian Project

This phase is the foundation of the HAL Transition Courses and upcoming Group Classes, where I work within the ATE phase of Er´Th, the ATE Pleiadian-Sirian Projects and the attempts to undo the effects of the timeline event. However, today the remnants of the ATE Pleiadian Projects can only be found in the plant kingdom (nature) and in the organic bio-forms, i.e., the construction of the bio-field and the emotional field (transformation of energy) and the ATE Sirian part can be found the construction of the brain and the developmental programs (transmutation of energy).

Article 2 September 2021

The ATE Pleiadian Project in Overview (Organic Cellular Level - Vibrational Balance)

1. Generating a habitat that in itself could heal and mend the racial grids (nature and our reality).
2. Generating a lifeform that in itself could heal and mend the bio-field malfunction without harming the surroundings (our organic vessel – albeit very altered now, hence lots of cleanup to do).
3. Generating field systems that could transform the bio-field and the vibrational field to original reality field settings (the emotional field – bio-field connection aka the PNS and cellular structure).

The ATE Sirian Project in Overview (Mental Level incl. Deep Alteration of bio-DNA)

1. Generating a field to transmute the consciousness units, and clear them of the 3rd cycle effects, i.e., the brain field, in which the transmutation dynamics of the radiation field could be re-integrated.
2. Generating an alternate energy system to support the effects of the brain field and its connection to the bio-field (the brain field – bio-field connection aka the central nervous system).
3. Generating new developmental programs to support the vertical transmutation processes in the brain field to assist in the horizontal processes of the transformation fields (spectra of energy).

The Dynamics of Progression – read again with the new perspective in mind.....

Overview of the Transition Work for the original LPU races and HM races (Systemic and Solar Races)

Below, an overview of the four main forces and energies, we operate within and are to master. Mastery means to perceive, understand, work correctly with (using the Principles, Rules and Laws) and then transform or transmute what is encountered. *More is described in the HAL Transition Courses as well as the other upcoming courses and group classes 2022 and onward.*

The HAL Project Advanced Articles

Explaining the 4 Main Dynamics of Progression

- 1) This work includes what is within our energetic state of current existence, i.e., the three lower and three higher order fields, as well as on our past timelines and their genetic connections to artificial work stations (such as the OWO 4D operating stations driven by the regressed races and their non-biological entities, or the remaining fallen 5D work stations from the Atlantean humanoid colonies). It also involves the work with the Lunar energies and grids from which our bio-DNA is built.

The NGC is chewing its way through these levels on the collective timelines of our solar system within the original holographic grids, but our personal work remains and is ours to do, since it is part of our 6 layered fields and thus our responsibility. Remember, there are collective timelines and individual timelines.

This means that once the collective timelines of the original LPU and the original HM Solar System holographic grids are cleared, if we are not in alignment with these, we will be drawn – due to energetic and genetic affinity – to the reality fields that are in alignment with our energy system, cf. the relative reality dynamics.

- 2) It involves the understanding of the NGC Dynamics and how we catch the wave of activation and clearing to regain as much of our original structure as possible, or to dissolve it in order to upgrade our 6 layered energy system (6th dimensional work).

From *the HAL Philosophy Book*, pages 42ff.

Given that our system was to develop the 6-12 pillar, it was built with 6 developmental realities and their adjacent progression pillars – we can call these towers of other-dimensional existence - into which the races progressed their energetic and consciousness potentials:

1. The 1-7 pillar (the D1-7 individual segment of knowledge).
2. The 2-8 pillar (the D2-8 racial segment of knowledge).
3. The 3-9 pillar (the D3-9 reality field segment of knowledge).
4. The 4-10 pillar (the D4-10 systemic segment of knowledge).
5. The 5-11 pillar (the D5-11 holographic segment of knowledge).
6. The 6-12 pillar (the D6-12 universal segment of knowledge).

The 6 developmental realities held dissimilar versions of the human lineages. These were called *root races*. Each root race had their own variation of energy sequences (what we call DNA) to build the organic vessel, a distinct energy system and specific consciousness units. All the root races were designed to achieve the highest purity rate, the highest standards and the highest progression rate to be met in their realities, assisted by the developmental programs of their pillar and the approved governance of their reality.

The Activation and Cleanup Stages of the Completion Cycles

1999-2007: Activation and cleanup of the holographic-technological segments of the minor and major grids within the 5-11 pillar, i.e. the Atlantean Project and Technologies.

2008-2016: Activation and cleanup of the systemic segments of the minor and major grids within the 4-10 pillar, i.e. the Sirian A-Pleadian-Nibiruian Projects and Technologies.

2017-2025: Activation and cleanup of the reality field segments of the minor and major grids within the 3-9 pillar, i.e. the Lunar-Andromedan Projects and Technologies.

The HAL Project Advanced Articles

Article 2 September 2021

All these projects lead to unfortunate futures ruled exclusively by technology and non-biological lifeforms, which all fields supporting these ancient projects, their templates and genetics must be either transmuted into their higher order counterpart or downward transmuted into dust.

The clearing processes of these ancient programs and collective timelines are almost done, including their cluster segments and nodal points with Advisory Boards, Holographic Teaching Systems and original 6th dimensional technologies part of the original Pillar Project.

The Planetary Level and Our Near future

2026-2034: Activation and cleanup of the racial segments of the minor and major grids within the 2-8 pillar including the racial grids within our planetary system.

2035-2043: Activation and cleanup of the individual segments of the minor and major grids within the 1-7 pillar including the templates and first Library settings upholding the current humanities in the 6th dimension.

After this process, the original LPU or the Pillar Project will no longer be part of the current after timeline event solar system (the ATE solar system). What was viable and functional from these levels of the ATE solar system have then been transferred to the original Solar System Holographic Reality Settings, holding holographic-radiation-vibration energies or HRV-energy aka density energy.

- 3) Our work is to meet the criteria of the original cycles under either the before timeline event LPU (the BTE LPU) or the original evolutionary cycles as taught in the Pillar Project under the original Er'Th solar humanities. This is part of the Solar System Transition Dynamics.
- 4) How to manage a life within our world as it changes due to the remaining dharma of the foreign races present in our solar system and what they need to complete to finalize their cycles of evolution. In that game, we are pawns and experimental puppets of their convenience. This level is already worked with in the HAL Project Blue Flower (how to arrange a base program life, and do this work) as well as the HAL Basic Idea Courses.
