

# On the Shift of the Sun

Randi Green © 2020

## Disclaimer

*Nothing in this article is scientifically provable. It is from a higher order perspective and the progressive energetic understanding of our reality. And since that is not part of the general sciences, the information given in this article will contradict what science claims or currently knows. It is not my intention to disinform but to share what I see and know.*

*The information is mostly seen from a density 2 (D4-6) level, and not within present-day (D1-3) timeline event driven sciences. The background of the information given here is to be found in the HAL Philosophy book and partially in the Souls of Humanity. Also read the free material on the website under the HAL Project.*

## On the Changes in the Sun

In 2022 the sun will initiate the transformation into density 2 (DE2) to match the progressive energies of the NGC, which will affect our solar system, and us, energetically. In 2007 the sun began the process of shedding off its density 1 (DE1) energies; in a way it has gone reverse since then, following the stages of the retraction of the timeline event. The transition of the sun is completed in 2021 in the northern hemisphere and in 2022 in the southern.

*Density 2 holds sub-dimensions of D4-D6. There are both regressed and progressive versions of the DE2. All universes will continue within the DE2 as the lowest point of organic existence.*

*Density 1 holds sub-dimensions of D1-D3. The DE1 is composed of timeline event energies in a mix of 3<sup>rd</sup> cycle and distorted D5 energies. These energies are decaying. What is within the DE1 must either transform into the DE2 or retract into the before timeline event 3<sup>rd</sup> cycle. This cycle was left behind eons ago and thus not viable for a continuation of any prolonged organic existence. Only machines and crystalline races can exist there.*

As the sun shifts into the DE2, the energies will change profoundly. The shift of the sun could be likened with a letting go of an old energy body, and lifting up into a new. That is what the sun will do. The DE2 level of the sun will detach from the DE1 level, leaving that behind in the DE1 sections of our universe.

This means that the sun in the sky will be the dying DE1 version of our sun, and the DE2 version of our sun will continue its function within the progressive DE2 resonance fields. In essence, a transcension of the sun. This will have two main effects, all depending on which grids we are positioned on, i.e. following the relative reality dynamics.

## First Scenario

If we are positioned within the timeline event energetic settings, i.e. the DE1, the dying sun will at first feel hotter and stronger, generating warmer weather. General science will not detect the higher solar radiation as coming from the sun, but instead attribute it to a weaker magnetic field.<sup>1</sup> As the energies and life sustaining codes of the sun move into DE2, what remain in the DE1 are the kinetic processes of a dying star.

---

<sup>1</sup> The weakening of the magnetic field is happening, because the sun and the magnetic field are interconnected. This is not a general scientific fact. It is not a fact, because science think the magnetic field is generated by a planetary molten core and the kinetic effects of the rotation of this.

# On the Shift of the Sun

Randi Green © 2020

Technically it is already undergoing this process, and has been for a long time, but the shift will increase the process.

However, since science has determined that our sun is viable for at least a million years or so, they will not see the changes in the sun (because they will not look for it) until the DE1 energies hit the spectrum of a [white dwarf](#). Then, they will know, because at that time the sun gets cooler and our planet will go into the long prophesized upcoming ice age. This stage of decay will be similar to what happened on the other DE1 planets in our solar system, which did the similar process ages ago. So, at first, we will experience a global warming, only to be followed by a global cooling. The timeframe of this is unknown.

## *Second Scenario*

If we are following the NGC, the DE2 levels of the sun will fuel our energy system and code sheets, as we similarly do the shift into the DE2 within the next phases of the NGC. This will bring to life our DE2 genetics – for good and ill – and our work will follow whatever shows up within our perception field.

Another side effect of following the NGC, is that the hotter DE1 sun will not affect us in the same manner as other people. We will adjust to the progressive code sequences of the DE2 sun, which we technically are experiencing as well having a “double sun exposure” going on (DE1 and DE2) and if we work with our bio-field to keep the organic cells at their highest purity rate, the warmth of the sun will not be felt. We can adjust our bio-vessel to withstand the changes.

*The HAL Educations will work on the higher order sciences to meet up with the organic shift. The courses will outline the initial stages of the year-long work and then we educate ourselves to understand the organic vessel, amongst other important issues, in order to develop this as well in its correct ways.*

## **3-Fold Brew of Energies**

We have reached the middle section of the 3-9 pillar transformation process of the NGC, which runs from 2020-2022. The middle section of the NGC activates and clears the code sheets and the holographic levels of all energy systems in lifeforms and realities on the radiation and vibration fields<sup>2</sup> and that coincides with the changes in the sun. Furthermore, the timeline event has reached its point zero state and that will affect the regressed grids as well.

*So, we have 3 factors in play, in our reality*

- 1) The incoming NGC energies.
- 2) The shift of the sun into DE2.
- 3) The completion of the timeline event, retracting all 3<sup>rd</sup> cycle timelines to their initial setting. And the response from the regressed factions having control of our solar system.

This will make a nice recipe for energetic chaos to put it mildly. And this brew of energies will hit us on all 3 levels of our being, i.e. on the bio-field (following the NGC because of the holographic grid energies) on the emotional field (following the sun because of the vibration fields of our energy system connected to the sun) and on the mental field (following the completion of the timeline event, allowing the brain to shift

---

<sup>2</sup> All of this is explained in *the Souls of Humanity* and updated in *the HAL Philosophy* book.

# On the Shift of the Sun

Randi Green © 2020

back into the radiation field). And not to forget the prohibiting technologies and the regressed genetics in our energy system, also affected by the 3-fold brew of energies.

However, the ways this will unfold are different within the northern and southern hemispheres due to the two main differences in the overall grids running in the two parts of our world. The northern hemisphere is mainly operated via the 3-9 reality field and 5-11 holographic-technological grids, and with that the effects from the shifting of the sun will be felt in a density 2, original dimension 3 (3<sup>rd</sup> cycle-D3) and 5 (regressive and progressive DE2-D5) level. Plus, the northern grids are affiliated with the Atlantic and [Arctic Ocean](#) and the upper sections of [the north magnetic fields](#).

Conversely, the southern hemisphere mainly is operated from a 4-10 systemic level, i.e. the interracial grids, seeding and operating in Australia as their base of global operations. And the well-hidden original Lemurian versions of the 6-12 universal grids. Thus, the sun will affect the southern hemisphere in a density 2, dimension 4 (regressive and progressive DE2-D4) and 6 level (regressive and progressive DE2-D6). The southern grids are affiliated with [Antarctica](#) and [the magnetic south pole](#).

*The field lines of the magnetic field are different in composition, energetically speaking, and combined with the distinctly different sections of the holographic grids, the NGC incoming activation and cleanup energies will work differently on the grids.*

The holographic grids define the energetic settings on our planet on a density 2 level. In density 1, our current energetic setting, the energetic changes have not reached their full potentials, but as the DE2 from the sun and the incoming higher order energies of the NGC hits the core of our reality (not a planet), these will affect the resonance fields (that was the activation and cleanup of the first 3 years of the NGC 3-9 pillar phase, i.e. in 2017-2019) and the NGC energies will hit and amplify the holographic grids the next 3 years.

*This is bound to generate effects in all lifeforms, as well as in nature, since both are built of holographic code systems, originally aligned with the resonance fields and the holographic grids of our reality. And yet, the differences will be dissimilar in the north and in the south.*

## **The Effects**

Aside from the “normal” human experience, the world has different grids operating on the DE2 levels of its original reality settings. The original grids in the 6-12 pillar code settings, since our reality technically is a full 6-12 reality, only harboring the other grids due to transfer of the grids from the other pillars (and their realities, today seen as [the inner planets](#)) and the regressed grids within the 3-9, 4-10 & 5-11 regressed pillar.

Now, the regressed grids are operated by the intra-systemic races and their allied in the regressed humanoid realities, and they are not eager to change their operations in the world. So, naturally all hands are on deck from their side to prevent the NGC from doing its work.

This counter-dynamic halt the incoming energies and generates wobbles in the overall grids, similar to that of a flood that is being prevented from running in its natural trajectory. To complete its course, the flood then finds other passages to run via. The NGC will do the same.

# On the Shift of the Sun

Randi Green © 2020

Two levels are affected by the NGC in the next 3 years – aside from all the details provided on this in the HAL Philosophy book – the regressed genetics in humans and all lifeforms as well as the holographic grids controlling the environment of the world. The holographic grids, the racial grids and their similar energies in the humane energy system are the ones that will be targeted to prevent these from activating and clearing.

Since *the shields* that used to be above Australia are gone, the higher energies from Antarctica (the field lines are strongest around the poles, and the NGC will amplify the magnetic field, this will cause changes in the weather system of Antarctica) along with the sun amplifying the radiation level equally, as the field lines of Australia get amped up by the higher radiation level. This will set the new code standards for the world.

The Arctic will awaken as well. We have only seen the beginning of this, as the warmer water beneath the icecap will wear out the ice shelves and open up to the old grids, hidden beneath. Not even the lower energy of the indigenous people (Greenland is notoriously known for incest and alcoholism) or the dumped radiation pollution from the old military bases, can keep the Arctic from awakening. As the upper level of the magnetic field sparks to life, the extremely ancient grids of the 6-12 pillar will as well. Lots will surface on the inner planes of perception as this happens. That will affect the racial grids and what human genome can hold of energy.

*North Magnetic Grid Activation: Racial grids following the awakening of the Arctic.*

*Southern Magnetic Grid Activation: Global Holographic grids following with amplification of the Antarctic.*

All factors are building up for more heat and more erratic weather worldwide as part of the terraforming of our planet, the genetic modification and the redistribution of wealth and power, but mostly in Australia where all things manifest first. But humans can adapt to the higher radiation level, if they live in [a higher energetic state](#), following the highest purity rate (turning herbivore or frugivore is the first step). And if they do the needed energy work to clear and follow the 3-fold energy combination of changes. And humans are to alleviate the effects on the animals in their care. More on these changes in the HAL Innovation section.

The HAL Philosophy book and the NGC Transition Courses 1-4 will give further information regarding what can be done. And the HAL Educations will grasp these topics too, to find solutions and methods to work with the changes.

## **Background Information**

From the HAL Project paper – read it all to get the full picture:

*The NGC infusion in Australia began in Spring 2018 within the 6-12 pillar grids, as the first country in the world to get the 6-12 infusions. The systemic 4-10 grid activation and cleanup should have been completed in 2007-2016. However, the 4-10 reality grid (from the 4<sup>th</sup> to 10<sup>th</sup> dimensions) in Australia still have work to be done because of the extra-systemic Settlers and colonizers using this grid to fuel their adjacent realities and timelines.*

# On the Shift of the Sun

Randi Green © 2020

*An issue similar to what unfolds in all older sectors of our world, i.e. the countries of the southern hemisphere, where these races reside.<sup>3</sup> The longer the extra-systemic races in these countries are halting the NGC energies to infuse the reality grids, the worse the effects will be in these sectors.<sup>4</sup>*

*Australia is important, because if Australia does the energetic and consciousness transition as the first country, and follow the energies of the NGC actively, the rest of the world could follow more easily.*

*What is seeded into the grids of Australia, allow for seedings other places as well, since the first human colonies were created in Australia and thus the country carries the original settings for all of the other grids in the world. Thus, what happens down under can spread to the rest of the world, including affecting the big countries Australia is allied with such as America, China and India (and perhaps Indonesia).*

*This also means that all regressive genetic seedings have been and are done in Australia first to seed this possibility into the racial grid.*

---

<sup>3</sup> The older sectors are the “cradles of life” as we understand it, i.e. the places on our planet where we find early traces of humans in whatever form, they are found in. These areas also have had their stages of high-cultures, which are now long gone.

<sup>4</sup> It is like a dam effect. The attempt to block the waves of energy will eventually lead to an overflow. It would be a smarter move to allow for an osmosis effect to run instead, implementing the energies bit by bit, and upgrade all of their assets accordingly to be able to contain the energies. But naturally, if humans and technologies run on the original energies of our system, the old lineages would lose control of both. Talking sense to these races are not possible.

## Introduction to the HAL Project Worldwide

In the big perspective of things, we need to change the ways we have arranged ourselves and the ways we utilize our planetary and natural resources. Science anticipate that all energetic changes in our reality run in a linear fashion, probably because they view our planet as a closed environmental system with few and limited feed-back dynamics, and they have in-calculated that in their prognosis of the changes to come and how much time humans have got to do the transition.

However, the energetic changes do not run in a linear fashion, given that they are the manifestation of extra-systemic energies from other-dimensional realities. All of which are levels of reality, science do not understand yet, let alone that these dimensions affect our world in higher order scientific ways. Hence, every single calculation done by sciences, building upon a worldview of few dimensions of reality, are more or less incorrect.

All energetic changes, such as erratic weather patterns, the ebbs and flows of the water tides, the energies in volcanic activity, the movement of the tectonic plates, the subduction mechanics, the possibility and probability rates in the quantum fields, the magnetic polar shifts, the solar cycles, the virtual discharges in atomic fields and appearances of new clusters, the cyclic changes in nature, the development and mutations in lifeforms, the opening and closing of dormant DNA, the bacterial and microbial activation and similar micro and macro energetic systems, are all governed by the extra-systemic cycles of change.

*The extra-systemic cycles of change* originate from realities beyond present-day understanding. Realities composed of other-dimensional worlds and density systems inhabited by advanced progressive human and the humanoid races, living in highly advanced systems beyond the accepted level of science. Our universe might look depleted and devoid of any forms of life, but only in the atomic section of it, i.e. the accepted 3<sup>rd</sup> dimension with the dynamics of space-time, relativity and the speed of light as the ruling vectors of change.

The extra-systemic cycles of change run exponentially and cycle in and out of our field and matter reality,<sup>5</sup> amplifying each other when they enter. And this time around, they carry with them the energies of the NGC. *The extra-systemic energies*, behind and driving the cycles, build up and reinforce similar energies in other sections of the fields, be it on a quantum, atomic or molecular level. In the beginning, the extra-systemic energy appears with unnoticeable changes in selected nodal points within the minor grids, in a series of smaller cyclic changes, and later on with major cyclic energies into the main grids.

The extra-systemic energies can be alleviated and implemented to generate productive changes, and allow for higher order levels of reality unfold. This is the natural way in all progressive systems. Progressive systems are built upon changes, and the willingness to instigate changes. Contrary to our current world setup that is built upon status quo systems to keep our solar system stuck in the density 1 (D1-3). Therefore, if the smaller cycles of change are not met in the accurate manner and implemented into the energetic fields governing our reality and additionally integrated into the human energy system, and

---

<sup>5</sup> Our reality is made up of fields of energy, which are holographic in nature. The holographic resonance fields hold the possibilities to unfold as energetic waves or particles, i.e. the code systems to generate light and matter. Change the code systems and the properties of waves and particles will change from their density 1 version (D1-3) into a density 2 (D4-6) version, where waves and particles can take on 4<sup>th</sup> dimensional features. Once that happens, the human consciousness-energy interaction potentials will be restored.

# On the Shift of the Sun

Randi Green © 2020

utilizing the extra-systemic cyclic energies for individual and collective progression,<sup>6</sup> the incoming energies of the major cycles will build up to disruptive heights and instead of instigating the long-needed changes, they generate disaster. Which they already are. And, there are several cycles of change to be completed in our solar system in this present age, given that the old systemic cycles are coming to an end.

Subsequently, our reality and all that is in it do not change in a step by step manner, where humans can do what they need to do in the slow pace, they prefer. It changes accordingly to the larger extra-systemic changes beyond our human control. The only thing humans can control, is to follow the great leaps of change or to resist them.

Nonetheless, as we know, selected groups of humanity have been in for a rough awakening for some time now, although any attempted implementation of the extra-systemic energies are moving far too slow to meet up with the systemic changes. Mainly because most of these good-intended groups were used by the extra-systemic races in our system, which are not really in for the changes, but knew they had to face up to some of them to keep status quo and to be able to control the incoming energies.<sup>7</sup>

We are seeing the effects of the none to incorrect implementation now – and more disruptive occurrences will arise within our reality as the extra-systemic energies of change escalate exponentially, especially as long as there are no humans to implement the energies correctly. This is how it works.

At the same time, we are also struggling with the lesser forces operating within politics, national economics and the administration of planetary resources. All of these areas have been governed from a perspective of restricting any forms of real progress to maintain status quo and the power systems of the leading factions. They would rather let our world run to point zero than given over their power.

However, none of this takes away the individual responsibility of every man and woman, having accepted the circumstances and what was offered to them from the human lineages in power. Humans have willingly participated in the world show, enjoyed the ride and willingly given away their power of influence.

Nevertheless, all things must come to an end or change, and so must the merry-go-round of the anti-progressive world leadership, the greed run big businesses and the comfort zone ways of living, humans have accepted so far. All of which are the essence of humans living with their head in the sand, or as we say it in Denmark; with their head under the arm.

---

<sup>6</sup> All of my work is an attempt to teach these sciences.

<sup>7</sup> The anti-progression races could control the extra-systemic energies when these entered into the minor grids. A delay that was done by relooping the reality grids into a previous probability rate of energy (a previous branch of the timeline). But when the energies will hit the major grids in the years of 2020-2025, it will not be possible to halt the dynamics or delay any further. As the major grids begin to activate and reset, all of the nodal points in the timelines belonging to the old cycles will dissipate, including all branches of alternate realities. A fact that has led to a huge withdrawal of the other extra-systemic races, taking off while they could. However, since our universe is part of a very big universal community of races, there are still many of the lesser progressive races left in our system doing business as usual as long as they can.

# On the Shift of the Sun

Randi Green © 2020

## **About the HAL Project**

*Our world is bigger than we think and we need to incorporate that into our world perception to truly grasp the higher order sciences such as the understanding of our reality field, including the many energetic laws governing us and our world, unfolding the full version of our reality. If we continue to exclude these levels of our reality from our perception and understanding of our solar system, we will exclude our chances of new perspectives, alternatives and solutions to a better future for us all.*

*The contemporary human perception will not give us the needed solutions to the transition challenges, we are to face in the upcoming years within all levels of society. Solutions to generate the higher order sciences, in order to solve all health issues, the climate changes, and the environmental challenges along with the transition challenges, instigated by the new grand cycle, within all areas of human systems and structures. The years to come will alter all aspects of what it means to be human in this world.*

## *The Changes to Come*

Humanity are to adapt to the energetic changes and learn to live in energetic flux as the other dimensions become an integral part of our perception of reality. We are also to learn to administer the effects of the past, the present and the future in our daily efforts to follow the Principles, Laws and Rules, which originally governed our world.

With the HAL Project, we will learn to focus on the world we have vs. the world we want and how to build it using the Principles, the Rules of Engagement and the Natural Laws of Energetic Utilization to do so.

Humanity has to develop a new awareness based upon an interactive reality, with new sciences, with new concepts of energy and matter, and the awareness of higher order realities. With the higher awareness lifestyle (HAL), changes are bound to unfold in the human inner and outer perception field and develop the psychological faculties, altering what it means to be human.

## *The Vision for a Better Future*

The goal of the HAL Project is to inspire and to develop the higher order awareness in those who are interested. The HAL Project will lead humans into having a progressive, communicative, developmental and environmental awareness, able to do their own creational projects or create new business projects to manifest the possible highest order reality into our world, for the highest good of the many.

## *The Inner-Outer Human Evolution*

1. The understanding of self and our reality must change to be able to follow the incoming energies of the new grand cycle.
2. New perspectives have to be offered so new purposes for the continued evolution of humanity can unfold, into which new business, creational and personal projects take part, together with a future vision from where the strategies can be defined to reach the goals.
3. Productive solutions and adaptable new ways of being human have to be offered, showing humans as part of a higher order human race in a joint evolution towards a new reality, we will build using these new sciences and understandings.

# On the Shift of the Sun

Randi Green © 2020

## *The How*

1) The offered possibility to do the human transition by changing the bio-field, the emotional and mental fields into the higher order energy system, composed of the vibration and the radiation fields.

2) Developing new forms of energy work to reconnect to the original progressive ways, using the Principles, the Rules of Engagement and the Natural Laws of Energy Utilization.

3) Develop creational projects and produce small businesses where the HAL Project can be unfolded into manifested reality with the goal of generating a higher order society, based upon higher awareness. This includes generating a better environment for the future humanities and their evolutions, expressing this into a purposeful life, while working with consciousness and energy.

## **The HAL Project in Australia, Europe and America**

As the extra-systemic energies hit the major grids in the 3-9 pillar final activation stages, along with the following completion cycles of the racial and individual levels of our reality in the years to come, active transition work is demanded to alleviate *the activation and cleanup processes* of the reality grids all over the world and the subsequent effects on humans, nature and all lifeforms.

This work is not only from a tangible mechanical perspective, but also from an energetic level enabling all lifeforms to be able to contain the new energies and what to do with the new ways of being human and the new ways of being bug, bird and animal<sup>8</sup> etc. And we can lessen the effects of the racial and individual activation and cleanup cycles, if we educate ourselves into how to do this work.

*The alleviation and transition work can only be done by educated progressive humans having the highest purity rate (a transformed high-energy organic vessel), the highest standards (transformed and upgraded vibrational field to match the standards of the progressive worlds and how they interact energetically with self, others and reality) and the highest progression rate (transformed and upgraded radiation field to grasp the higher order holographic-technological sciences and how to govern reality, develop grids and administer consciousness genetics in all lifeforms, including how to transform nature into holographic-density settings).*

Thus, there is a need for people who are willing to do *the HAL Progression Work* to develop themselves into a new type of human. Or more correctly, return to their true human self. As long as humans are having the incorrect understanding of who and what they are, including the deceptive and incorrect ways of working with consciousness and energy, they will have a useless understanding of self, others and of reality.

We need humans that are willing to learn and exercise the progressive ways. And who are willing to do the years of education it takes, the years of timeline and clearing work it takes, and the years it takes to change their ways of being human on all levels of their being. That includes the work with themselves, others and reality.

---

<sup>8</sup> Since all animals are built more or less similar to the human organic form, the energies of the NGC will also invoke changes in them. This means more advanced brain capacity and emotional upgrading. Not that animals will talk – but they are telepathic and it is just a matter of taking the time to work with them, before they will develop these abilities. Following that, the consummation of animals will end. Finally.

# On the Shift of the Sun

Randi Green © 2020

## **The HAL Philosophy**

*The HAL Philosophy is generated to create the information needed to understand the new ways of being human – as far as it is possible with our contemporary belief systems and scientific comprehension level. Including pushing to the surface the collective notion of the times, we were part of the Workstations and how we all used to do the universal pillar work. If a group of people would join *the HAL Educations*, after having done the HAL Progression Work, that portion of humans would be able to educate other humans in their surroundings to follow the energies of change.*

## **Important about the HAL Philosophy**

*The HAL Philosophy is not in any ways or forms, a continuation of any preceding philosophical, spiritual or religious systems. In most cases the HAL Philosophy disregards these systems.*

*But the essence in the ideas of moral and ethics are similar to that of other teaching systems, since all information given to humanity stem from the same concepts of the most optimal inter-relational human behavior that stretches back to the original humanities living in our solar system and how they arranged their civilizations, living amongst other human races and humanoid species to ensure common grounds.*

*Conversely, the HAL Philosophy is not just about inter-human relations or about humans living in an isolated environment as the only living species in our system, but about how humans are to behave in a solar system inhabited by other-dimensional humanities and humanoids along with being energetically connected to worlds beyond contemporary human understanding.*

*Therefore, the HAL Philosophy and the HAL Progression Work diverge from other, or similar, teaching systems due to the other-dimensional understanding, what a human is and how we can choose to progress all that we are, on an energetic level and on a consciousness level.*

*What is also to be noticed, is that the HAL Philosophy does not include any divine powers or godly creators in any ways or forms. Most of the old systems involve a cosmos founded by deities or a singular deity, from which humans are a creation to serve some sort of function of these creators. In fact, none of the old teaching systems incorporate a scientific conceptualization of higher order realities incorporated into a vast range of universes housing other human civilizations. On the contrary.*

*The HAL Philosophy approaches all ancient ideologies as constructions made by other-reality human races, living in adjacent worlds vibrating energetically unlike our world, or humanoid species having produced similar teaching systems as the means of control of humanity.*

*Because of this, the HAL Philosophy explanations, ideas and concepts, of why humanity should embark on a willed progression journey, are vastly different from that of other teaching systems.*

## **The Essence of the HAL Progression Work**

Progression is about taking full responsibility for all that we are and change what does not work, relative to what we want to become. It is also about facing the challenges of our lives, in this world, to get to where we are supposed to be and in that, reunite with the energetic standards and progression rate of our system.

# On the Shift of the Sun

Randi Green © 2020

The life we have, and our surroundings, show us where we are on the progression spiral and what we need to clear to gain the highest purity rate by unfolding the highest standards in what we exemplify, what we create and what we are. We do that to achieve the highest progression rate, which ensures an emplacement on the progression spiral according to our deeds, actions and achievements.

The inner and outer progression work focus on what is attainable and achievable to guarantee a better emplacement in the upcoming rounds of existence as well as the work to upgrade our current energy system and template, which will secure an even better emplacement in the next rounds, if we do both.

The HAL Progression Work is thus about making the ideal choices, following the guidelines of *the Principles of Progression*. It is about the ways we behave around other lifeforms, and how to obtain the highest standards by exercising *the Rules of Engagement* and finally the HAL Progression Work is about how we administer *the Natural Laws of Energetic Utilization* in our creations and manifestations of any form of energy. All sections are needed to reach the highest goals of progression.

## *To Summarize*

- 1) *The HAL Philosophy* provides ideas of how to live a human life unfolding and living by the higher order awareness, all aimed at reuniting consciously with the progressive worlds and their advanced human civilizations.
- 2) *The HAL Progression Work* focus on the ethical and energetic behaviors we have, as contemporary humans in this world, to become the best version of a human we can be. It also entails the work of preparing our energy system and consciousness units for continued existence. The Principles of Progression, the Rules of Engagement and the Natural Laws of Energetic Utilization are our guidelines in this.
- 3) *The Timeline and Clearing Work* transform our energy system, template and the consciousness genetics. *The contemporary goal* is to upgrade these levels by achieving the highest purity rate on the bio-organic level in the ways we live, the highest standards on the energetic level in the ways we behave and the highest progression rate on the consciousness level. *The future goal* of our work is to match the requirements of the NGC. We do that by clearing out all disruptive timelines and our participation in these, as well as all dysfunctional energies and infected consciousness units.

**More information will grow over the years, as the HAL Project is fully unfolded.**
