

# The HAL Academy – The Advanced Work with the New Rotundum

*In this online course, we explore the connections between the original reality fields and our experience of the outer-inner realities, as well as how these dynamics and energies affect our energy fields. We can get this via the advanced daily Rotundum Work. This information will be important in the next levels of energy work, as we move deeper into the terrestrial transition, as it rolls out, and our solar system goes into its last phases.*

To fully understand this course, the other HAL Transition Science Courses must have been completed, since they provide the background for the information used in this course.

## The LPRF1 Reality Fields – the Foundation of the Artificial Energy Systems

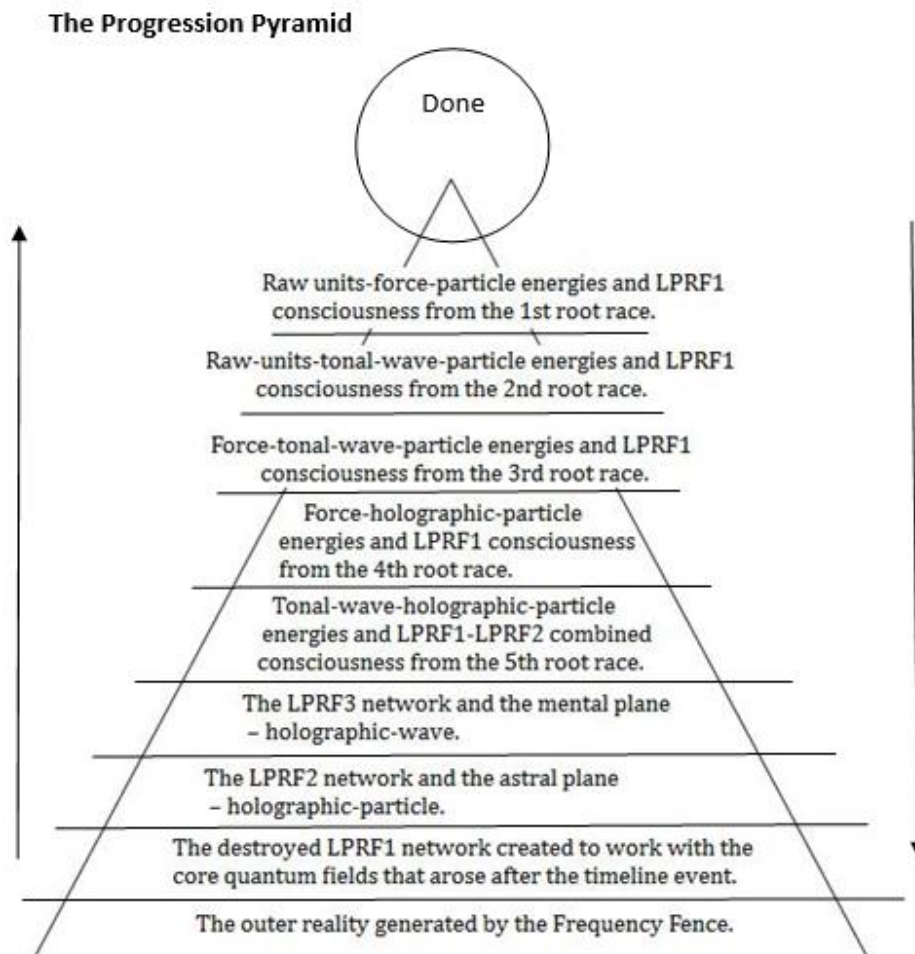

*Horizontal Movement (relooping and reality programs to keep us stuck)*

*Our reality is surrounded by concentric circles of distorted energy. And then we have our outer world as well. From the earlier HAL material:*

# The HAL Academy – The Advanced Work with the New Rotundum

## Vertical Movement (progression or regression spiral layers) to be cleared out

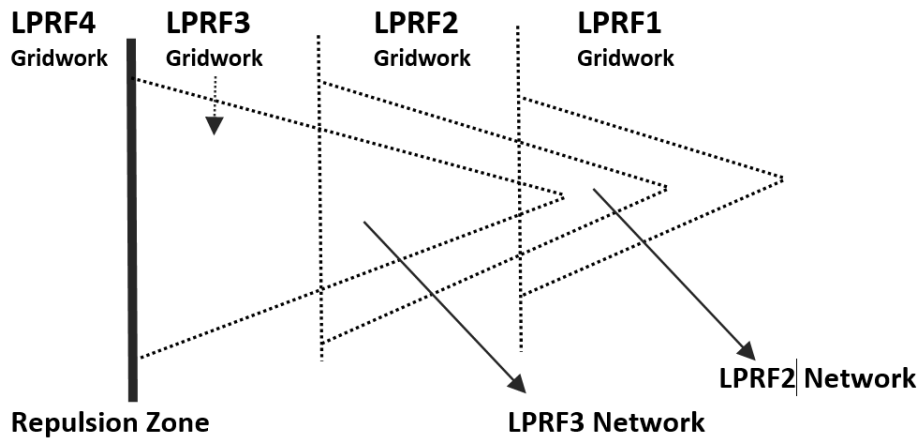

*The progression pyramid* is the mountain we have to climb to be able to progress out of our imprisonment and artificial modifications. We have to begin from below and work our way from the outer reality to the inner, and continue the cleansing, raising our energies in the chakras to the level, where they are not controlled by the astral, mental planes, or the remaining LPRF2 races existing here. When the planetary core is reached, we begin the reconstruction of the LPRF1 PES and the outer plane by transforming the lower planes of existence using the inner and higher planes to do so.

The goal of the horizontal-vertical clearing and progression work is to kick-start the transformation from the LPRF1 energies into the original domains and the original density energies that the true worlds are made of (original holographic-radiation-vibration energies or HRV energy units). From that we can attempt to rebuild, within our fields, the original energies behind to the solar system construction done by the Ancient Ones. *Thus...*

# The HAL Academy – The Advanced Work with the New Rotundum

*The gridworks and networks of the reality fields intersecting our reality field on the density levels DE1 (LPRF1) to DE4 (LPRF4).*

The illustration shows how gridworks turn into networks. A gridwork is the central racial field of a LPRF holding the encoded energy units as well as the plan for that reality field as it was laid into the gridworks by the Progenitors. Only when the genetics link up to a gridwork are they able to progress.

*The concentric domains as they unfold into our reality in density settings, where each domain covers several sub-fields, as explained in the HAL Books.*

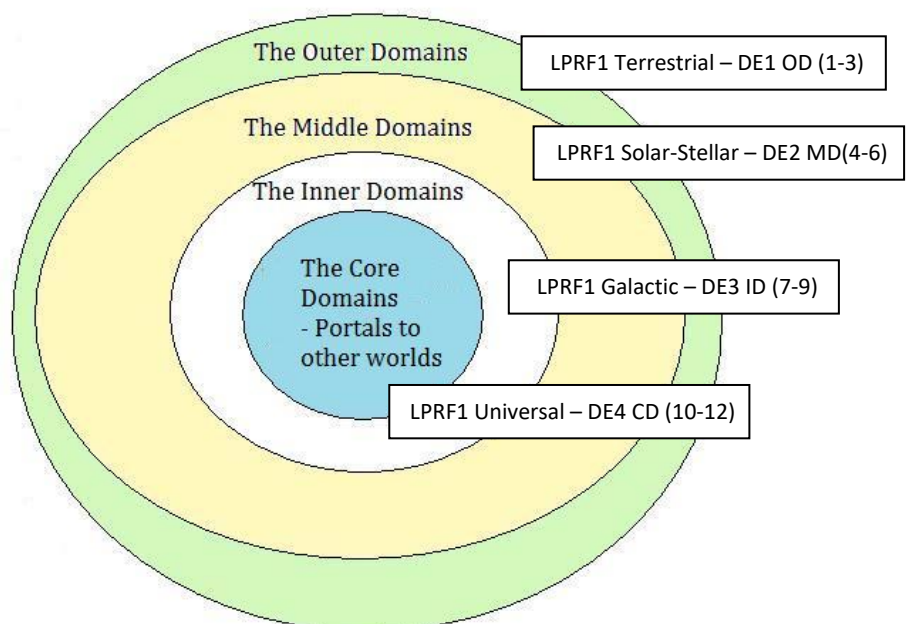

## The Domains

The Core and Inner Domains permeate the Middle and Outer Domains as radiation and vibration.

All Creation unfolds from within and outwardly; not from the outside and in.

The Three Principles are the basis of the Core Domains.

The Inner Domains are the areas of the True Worlds.

# The HAL Academy – The Advanced Work with the New Rotundum

## The Advanced Work with the New Rotundum

Firstly, we must understand that the work with the higher awareness is not an emotional-spiritual exercise, leading to mysticism or the inner light of ascension; it is as much a cognitive exercise using the higher order sciences to get to the point, where the mind can utilize the purified and adapted energies to fuel the higher order neural networks of the brain. The advanced work with energy plays a vital role in this.

We use the concepts of spheres within spheres and probability fields in our daily work with inner and outer energy interferences, both in our individual transformation work with the ego system but also in the inner field work, such as the clearing and progression work.

In the work with the energetic-dynamic cycles of the concepts of spheres within spheres and probability fields (from here on called the New Rotundum), we work with different dynamics that stem from outer and inner very subtle energetic influences. Via the energetic-dynamic work with the New Rotundum, we expand our perception sphere of knowledge using these energetic dynamics.

In essence, the goal of the New Rotundum work is to create a sort of discipline in the work, but also to allow us to detect, and then adapt to or transform the effects of the energetic settings happening in and outside our reality field in order to clear the unwarranted energies affecting the lower 3 fields.

So, what does the psychic-energetic sensing and higher order cognitive abilities include?

*The new feature will include the following 6 dimensions, whether it is the complex perception process of a true or artificial reality field, a lifeform, intra-systemic or extra-systemic technology and similar complex information systems (CIS), since all that takes form is in essence a CIS:*

- Linear psychic-energetic sensing and higher order cognitive dynamics investigating the item from the perception process of sequences of units (1D).
- Processual psychic-energetic sensing and higher order cognitive dynamics investigating the item from the perception process of opposition dynamics (2D).
- Systemic psychic-energetic sensing and higher order cognitive processes investigating the item from the perception process of synergetic dynamics (3D).
- Information system psychic-energetic sensing and higher order cognitive processes investigating the item from the perception process of holographic dynamics (4D).
- Coding and decoding psychic-energetic sensing and higher order cognitive processes investigating the item through perception processes of code complex information systems (5D).
- Integrative psychic-energetic sensing and higher order cognitive processes investigating the item via replication dynamics (6D).

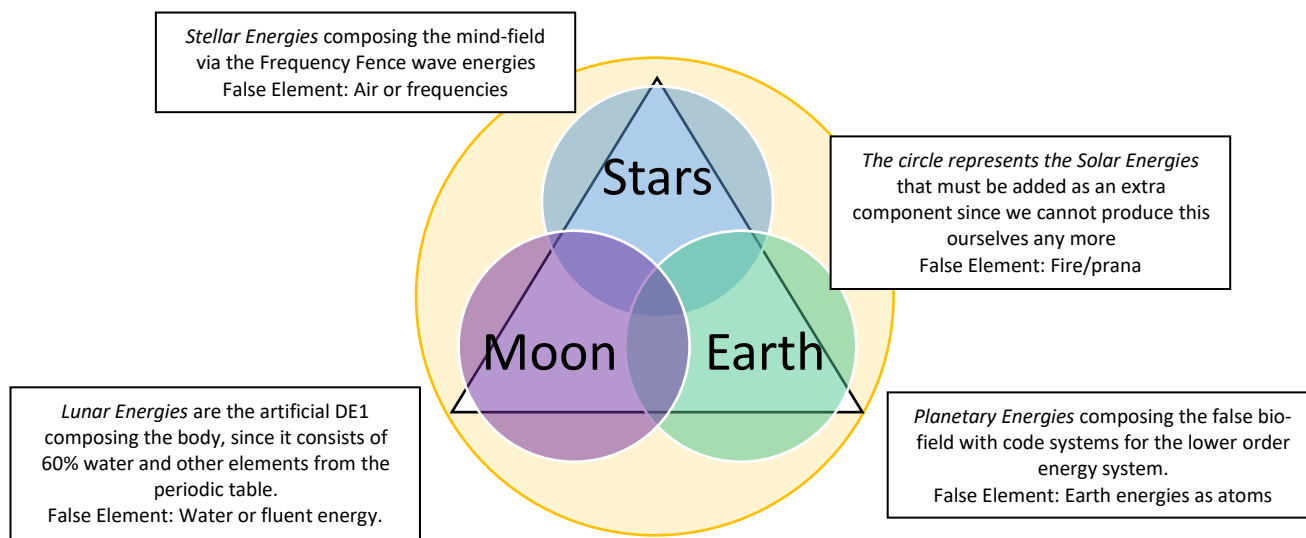

In the before-timeline event realities, the true human consciousness development would result in further 6 dimensions of psychic-energetic sensing and higher order cognitive processes, of which nature we at the current state of mind, can only speculate about.

The reality field energies fluctuate according to the different energetic-dynamic influencing the domains, gridworks and networks and these ripple into the individual 3 lower fields (the bio-field, the emotional field and the mental field). The vast array of energetic dynamics affects the human collective fields of thoughts and emotions, distorting the original terrestrial fields (the LPRF1) with energies from lunar, solar and stellar sources both as distortion energies from the regressed LPRF2 and as infected holographic LPRF3 residuals.

# The HAL Academy – The Advanced Work with the New Rotundum

## The 4 Groups of False Energies & Elements

The 4 foundational types of false energies in our body and energy system, we are to clear out.

## The Old Lunar Energetic-Dynamics (to be fully cleared out) – Foreign DE1 Energies

The applied Lunar energetic-dynamics are expressed in the in the 28-day cycles of the year. This naturally covers astrology as we know of it with star signs, dating back to the lunar priestly races of Atlantis (later recreated in the Babylonian-Baal System). The lunar energetic-dynamics are controlling the personal and collective subconscious and the deceptive layers of reality. So, we will not incorporate this in our work, just knowing that the lunar cycles are the realm of the counterforces in our work and cover the distorted racial grids.

Naturally, these have to be transformed too into their higher original density setting. This process is similar to the work with the 4 etheric fields, as explained in the HIC6 Class. We work away from the rainbow frequencies (lunar energies), into the false LPRF1 energies and into the higher order DE1 HRV energies.

*The Alice A. Bailey material state that the Moon is esoterically (that is energetically) covering the true energies from Uranus, i.e., the 7<sup>th</sup> ray. The 7<sup>th</sup> ray is the purple ray. This energy is used to do the clearing work of the lunar energies, that is, to transform the energies of purple via the blue-golden-white frequencies as taught in the HAL Integration Class 6. This nullifies the lunar energies also known as the lunar elemental energies that are part of the bio-field in 4 nuances of purple. We are to clear these into the true white Er`Th codes of the original bio-field of the outer domain.*

## The Solar Energetic-Dynamics (higher order energies emotional field) – now only a DE1 Sun

The energy currents are divided into the two hemispheres with different forms or high and low energies. The division is important in our work to maintain our energetic balance and not be sucked into the false DE2. Listen to the 2022 Update 2 videos.

As the sun moves above and below equator and fuel the two hemispheres with either high or low energies, the magnetic field differ in energetic viability too. Different shield technologies have been utilized to keep up an artificial status quo in the two hemispheres, albeit this artificial upholding is generating huge amounts of kinetic energy, hence the constant heat in the countries using the shields.

## The Zodiac – Holographic Overlay System

You can find the 13 constellations of the ecliptic Zodiac [on the Internet](#). The movement of the Sun follows the 4 seasons, from March 20<sup>th</sup> until March 19<sup>th</sup> the following year. In my opinion, the zodiac is a holographic overlay (controlled by the limitations of the cells in the eyes and perception programs) to cover the active constellations behind or above the zodiac. It is put there to cloak the true work with the sky, via the original Sirian Cube technologies to undo the quarantine features in our brain field (for now put on hold).

## The Daily Energetic-Dynamic Transformative Processes

We do the individual daily work, using the energetic-dynamics of the LPRF1-DE1 Terrestrial energies and what is influencing our reality from above and beyond. However, if we want to work with the energetic-dynamics, to reach the original HRV energetic-dynamics, constructing and defining our template, we must apply higher order intersecting energetic-dynamics to everything we do, perceive and process of information via the lower order energy system in our daily energetic-dynamic transformative processes (self-restoration and clearing work).

### The Daily Energetic-Dynamic Transformative Processes:

The energy system can be worked with via three access points, from which we can initiate the processes:

1. The Mid-Brain Access Point gives access to the mental field and its four layered processes, in combination with the Throat and Solar Plexus Access Points.
2. The Throat Access Point gives access to the “expression mechanism” of our psyche – it is our voice and the place where the inner and outer human processes can be expressed.
3. The Solar Plexus Access Point gives access to the “sensation mechanism” of our psyche – it is the process unit of the emotional and mental field kinetic processes.

*The work with the mental field is best from 10pm until 6am morning – thus often missed due to sleep.*

*The work with the emotional field is best from 6am until 2pm.*

*The work with the bio-field is best from 2pm until 10pm, that is the end result of the day’s work.*

# The HAL Academy – The Advanced Work with the New Rotundum

## **Using Self-Scan and Innovation in the Advanced Energetic-Dynamic Work (the energetic-dynamic cycles of the concepts of spheres within spheres and probability fields)**

### *Step 1: The ability to self-scan your lower order fields following the New Rotundum Work*

All sorts of physical sensations (pains, heaviness, nausea etc.) are all signs of energetic unbalance or negative energetic activity. You use the 3-step ladder of perception to scan and get to the root of any physical, emotional or mental reaction.

- I. What is it from a normal awareness level?
- II. What is it from a double awareness level?
- III. What is the energetic information behind from a higher order awareness level?

### *Step 2: The ability to achieve energetic transformation following the New Rotundum Work*

Firstly, answer what you think it means to achieve energetic transformation.....

- I. From a normal awareness level?
- II. From a double awareness level?
- III. From a higher order awareness level?

Then ponder upon how you would engineer your Advanced Rotundum Work to achieve this energetic transformation in your daily energy work.

### *Step 3: The ability to achieve a higher vibrational-radiation states in the New Rotundum Work*

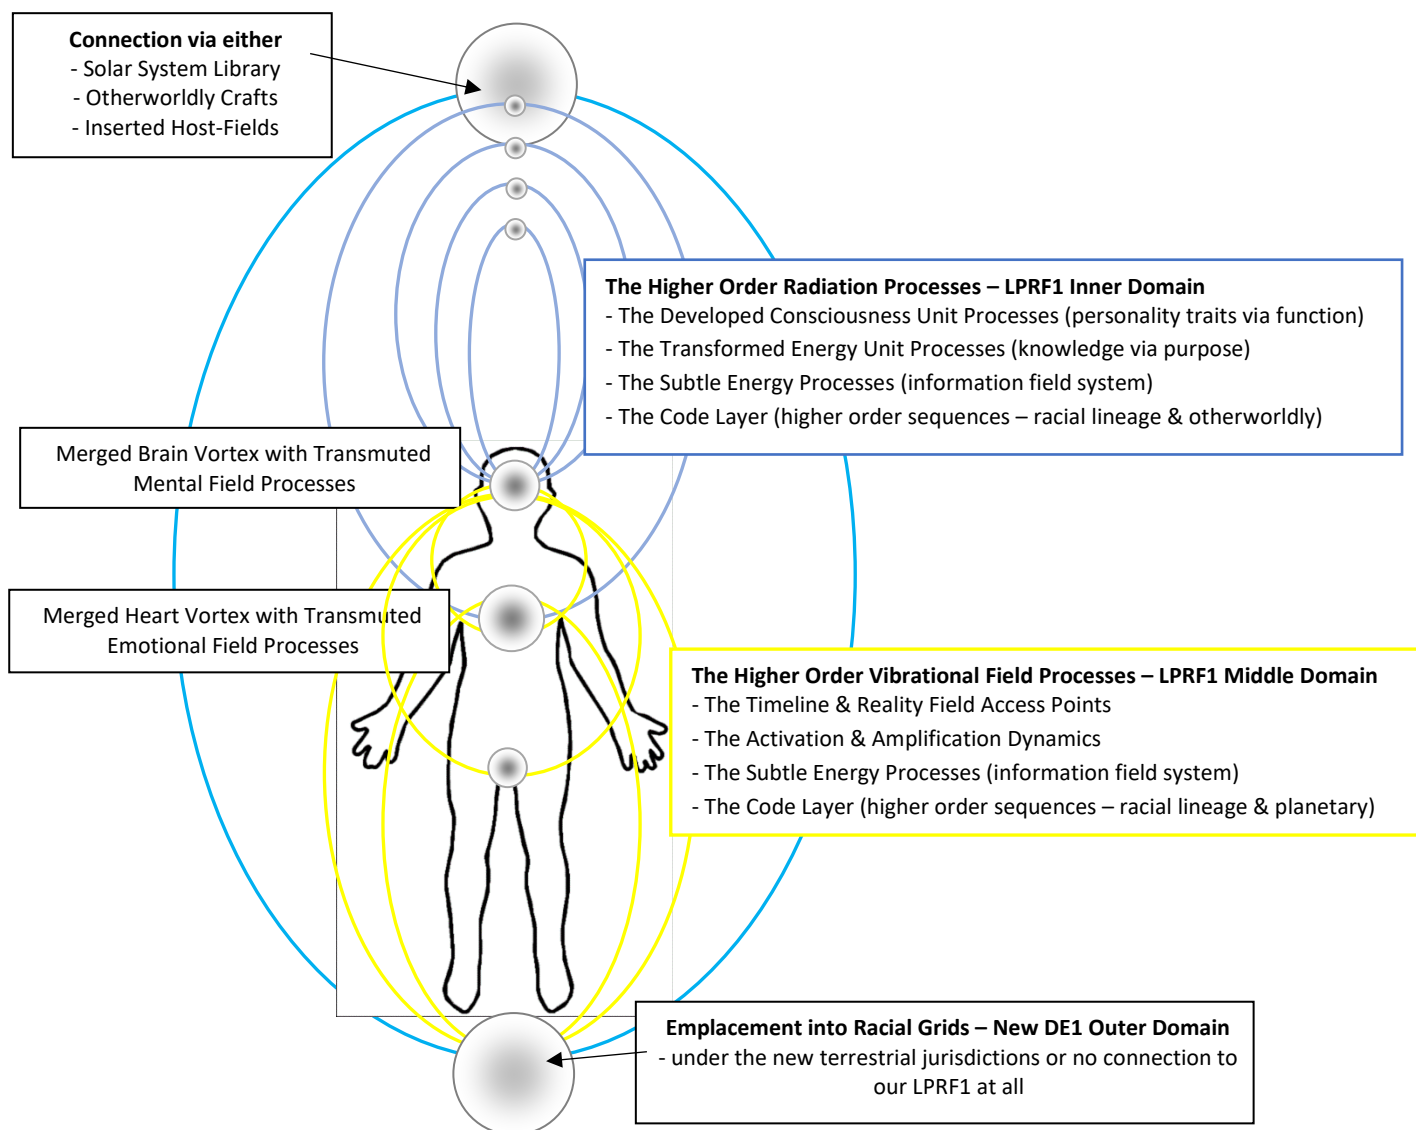

Firstly, think about what it means to have a higher vibrational or radiation states in the energy fields.....

- I. From a normal awareness level?
- II. From a double awareness level?
- III. From a higher order awareness level?

*Then ponder upon how you would engineer self-healing (code-repair) and self-scan exercises, as well as self-developing methods to achieve the higher LPRF1 density state in your daily energy work using the 6 cyclic energetic-dynamics – use these sets of dynamics to gain synergy on a 6<sup>th</sup> dimensional level.*

# The HAL Academy – The Advanced Work with the New Rotundum

## *The Transformative Energy System – To be Worked with in the Next Course*

*The higher order energy system can be viewed as multilayered composition of several energy fields with different access points, energetic orientation and processes of consciousness and energy. It expands from the personal experiences into the reality fields of similar forms of energy fields and consciousness processes.*

*The higher order energy system is thus a composition of the processes of raw consciousness and energy units to be developed and already transformed consciousness units (the CUs) and energy units. The goal of these processes is to develop new forms of existence.*

### **The Merged Lower Order Brain & Higher Order Radiation Processes**

Transmuted Neuro-Electric Processes (biological and otherworldly) into expressing the functional CUs adapted to ego structure.  
Transmuted Neuro-Chemical Processes (biological and otherworldly) into expressing the lower and higher order knowledge.  
Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.  
Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.

### **The Merged Lower Order Emotional & Higher Order Vibration Processes**

Transmuted Electro-Chemical Processes (biological and otherworldly) into incorporating timeline & reality field dynamics.  
Transmuted Nervous System Sensations (biological and otherworldly) into incorporating activation & amplification dynamics.  
Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.  
Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.
