

# The HAL Academy – The ACW of the IAT Quadrants Course 4

We continue the work with the inserted alien technologies, the three quadrants, the alien genetics and TEGs. Whether these technologies and their genetics are the result of wrongful use of energy, or have been inserted by the Colonizing races, the work remains the same. These genetics and technologies must be removed and evaporated for us to be able to return to the original DE1 sections of our reality field.

Prior to this course, the HAL Transition Science Courses must have been completed, since they provide the background for this course. The course also builds upon earlier material, although taking it to the next level.

## The DE1-LPRF1 Reality Fields – the Foundation of the Artificial Energy Systems – Now Resetting

*Our reality is surrounded by concentric circles of distorted energy. And then we have our outer world as well. From the earlier HAL material:*

# The HAL Academy – The ACW of the IAT Quadrants Course 4

**The gridworks and networks in the new reality fields after the Resetting of our entire system is completed. Of our interest are human groups 1-3.**

The illustration shows how gridworks turn into networks. A gridwork is the central racial field of a LPRF holding the encoded energy units as well as the plan for that reality field as it was laid into the gridworks by the Progenitors. Only when the genetics link up to a gridwork are they able to progress.

*The concentric domains as they unfold into our reality in density settings, where each domain covers several sub-fields, as explained in the HAL Books.*

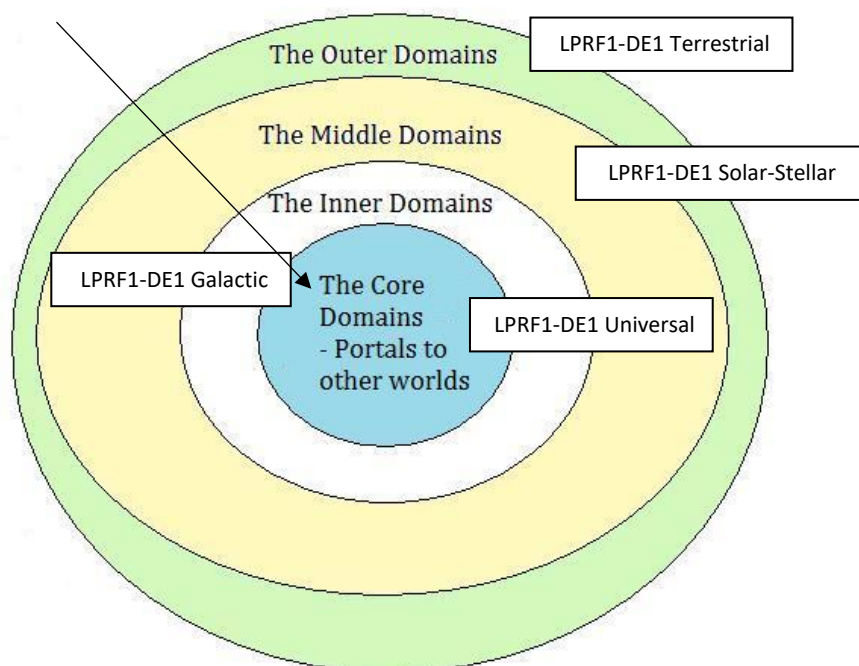

## The Domains

The Core and Inner Domains permeate the Middle and Outer Domains as radiation and vibration.

All Creation unfolds from within and outwardly; not from the outside and in.

The Three Principles are the basis of the Core Domains.

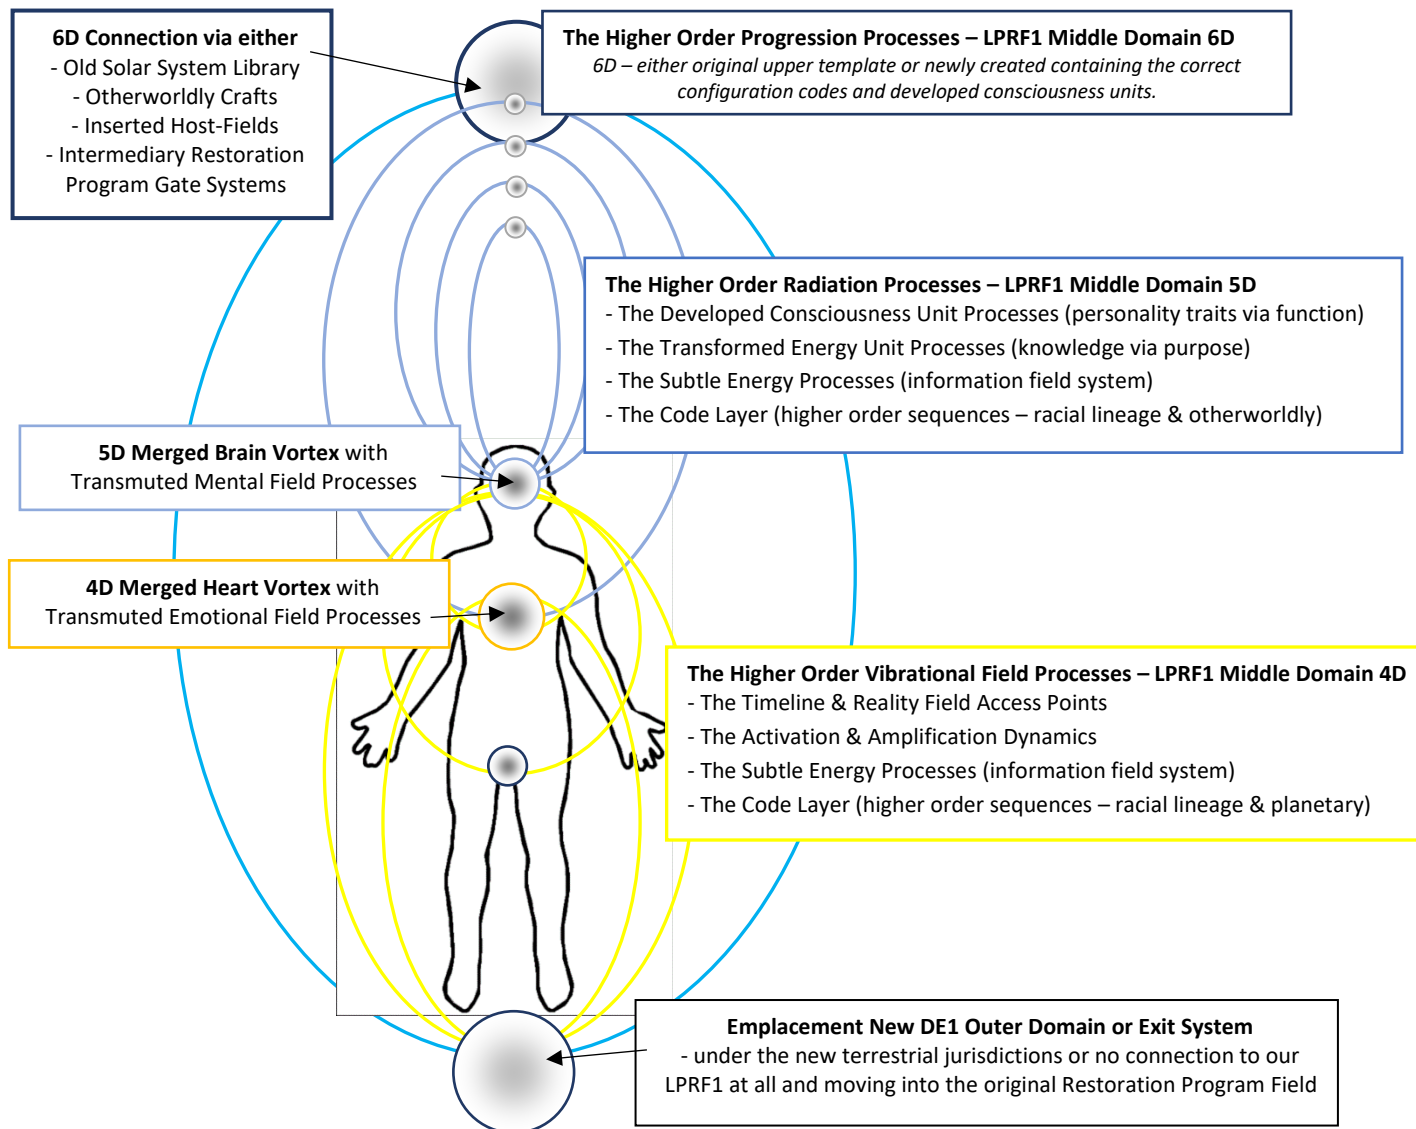

The Inner Domains are the areas of the True Worlds.

## The Higher Order Transformative Energy System in the LPRF1-DE1-OD

*The higher order energy system can be viewed as multilayered composition of several energy fields with different access points, energetic orientation and processes of consciousness and energy. It expands from the personal experiences into the reality fields of similar forms of energy fields and consciousness processes.*

*The higher order energy system is thus a composition of the processes of raw consciousness and energy units to be developed and already transmuted consciousness units (the CUs) and energy units. The goal of these processes is to develop new forms of existence.*

### **The Merged Lower Order Brain & Higher Order Radiation Processes**

Transmuted Neuro-Electric Processes (biological and otherworldly) into expressing the functional CUs adapted to ego structure.  
Transmuted Neuro-Chemical Processes (biological and otherworldly) into expressing the lower and higher order knowledge.  
Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.  
Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.

### **The Merged Lower Order Emotional & Higher Order Vibration Processes**

Transmuted Electro-Chemical Processes (biological and otherworldly) into incorporating timeline & reality field dynamics.  
Transmuted Nervous System Sensations (biological and otherworldly) into incorporating activation & amplification dynamics.  
Transmuted Subtle Energy Processes (biological and otherworldly) into expressing the dual information systems.  
Transmuted Code Layer (lower order planetary and higher order otherworldly) into expressing the dual code layer systems.

## The Individual Challenges in the Work

The individual challenges involve the work with the lower order fields and how we can clear these to get to the point, where we can rebuild our higher order constitution. As long as we are trotting along in our human form, exercising our human will, mind and emotions, we will not get to the higher order levels in us. The higher order levels of us contain the consciousness genetics, the original template and higher order energy system. These parts have been hidden from us. We are to figure out how to reconnect to the true parts of us and then put in the needed work to activate them.

To get to where we can recreate all that we are, we must solve the puzzle of the in-the-way lower order fields, i.e., the electromagnetic controlled overlay of the bio-field and DNA, along with the emotional field and mental field that hold programming to fit us into the base program (aka the ISP). The lower order fields are inserted to block the higher order energy system from connecting to our organic bio-field and allow our own code systems to unfold, leading us back to the density energies we also are able to process and integrate.

*The higher order energy systems and the organic vessel with its three lower fields:*

### Higher Order Energy System – the True Human; Progressive

Consciousness units

Code sheets, configuration and template

6D Energy system fitting the original solar system

### Lower Order Fields – the False Human; Regressive

Mind-field to be altered into the 5<sup>th</sup> cycle brain field

Emotional field to be altered into the 4<sup>th</sup> cycle heart field

Bio-frequency field to be altered into the 4-5<sup>th</sup> cycle bio-density field

### Organic form – Molecular

Bio-frequency matter is to be cleared and transformed by our activation of the higher order energy system, and then returned into density units, so far as it is possible, following the original DE1 OD settings.

*What humans hold of inserted alien technology and their subsequent alien DNA (altered extraterrestrial genetics altered into being able to latch on to the human DNA) will be shown in the bio-energetic clearing processes and get control of the unconscious electrochemical processes in organs, glands and cells. It will also be shown in the visions, or memories of past lives, defining the current emotional field and its content.*

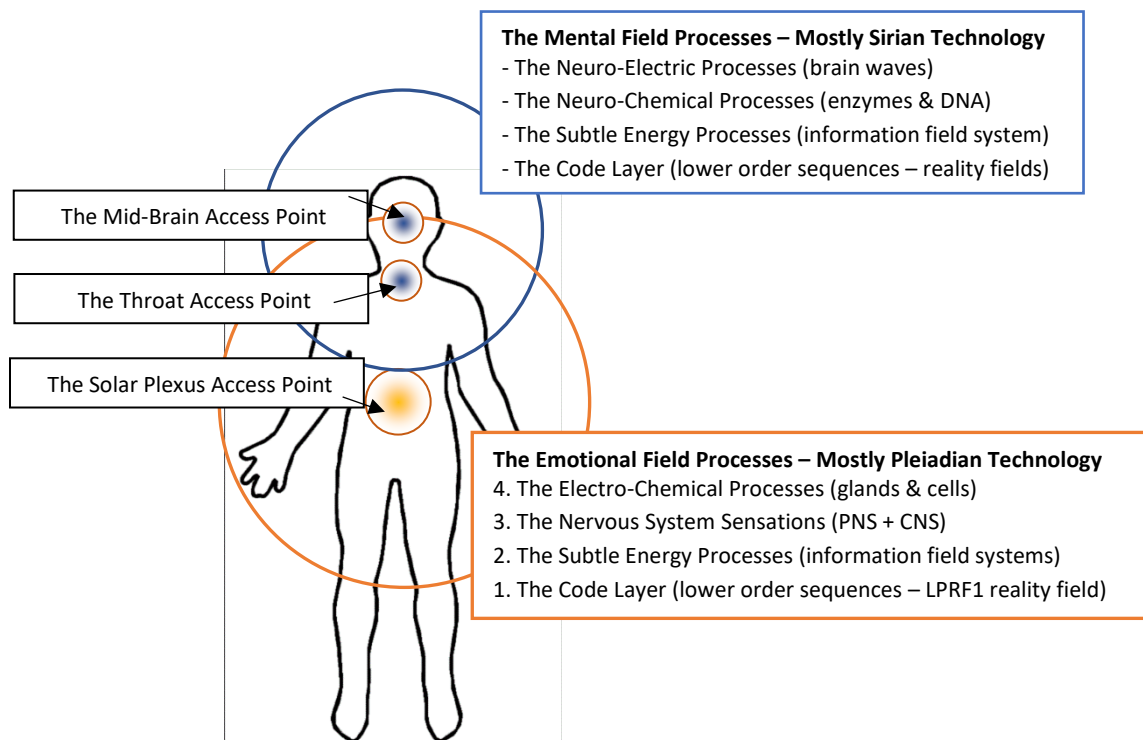

### Therefore....

- 1) The main goal of this work is to clear the regressed LPRF2 and infected LPRF3 inserted genetics, technologies and distortion fields from the three lower energy fields...
- 2) To get there all groups must work with the psychic-energetic transformation processes of the three lower fields in the lower order energy system....clones hold these as well.
- 3) Everything is interconnected....from the reality field energies to the energies of our higher and lower energy systems, and into the smallest unit found in the cellular construction.
- 4) When one layer is worked with, the other intersecting energy fields are also worked with.

# The HAL Academy – The ACW of the IAT Quadrants Course 4

## *The Clearing Work with the Access Points*

Two forms of energetic processes:

The lower order energy system can be worked with via three access points, from which we can access the different processes:

1. The Mid-Brain Access Point gives access to the mental field and its four layered processes, in combination with the Throat and Solar Plexus Access Points.
2. The Throat Access Point gives access to the “expression mechanism” of our psyche – it is our voice and the place where the inner and outer human processes can be expressed.
3. The Solar Plexus Access Point gives access to the “sensation mechanism” of our psyche – it is the process unit of the emotional and mental field kinetic processes.

Consequently, when we work with the emotional field, we work with its energetic levels, the constructed energy patterns and the material these are made of. We can divide these into 4 sections of work, from the outside and in. Number 4 is the outer bio-energetic processes and number 1 is the inner core fields – here in more detail than on the illustration above:

4. The electrochemical processes generated by the organs, glands and cells.
3. The nervous system sensations (subtle electrochemical) generated by the PNS.
2. The even more subtle psychic-energetic information levels of which there are 9 (8).
1. The code layer in the lower order sequences connected to the same levels in the reality field.

Via the sciences behind the different levels and energies of the emotional field, the work gets more advanced but also in some sense clearer. The levels are to be worked with and transformed through the opposition dynamics of inner-outer interactive potentials.

# The HAL Academy – The ACW of the IAT Quadrants Course 4

## Understanding the Quadrants and their Activation Potentials

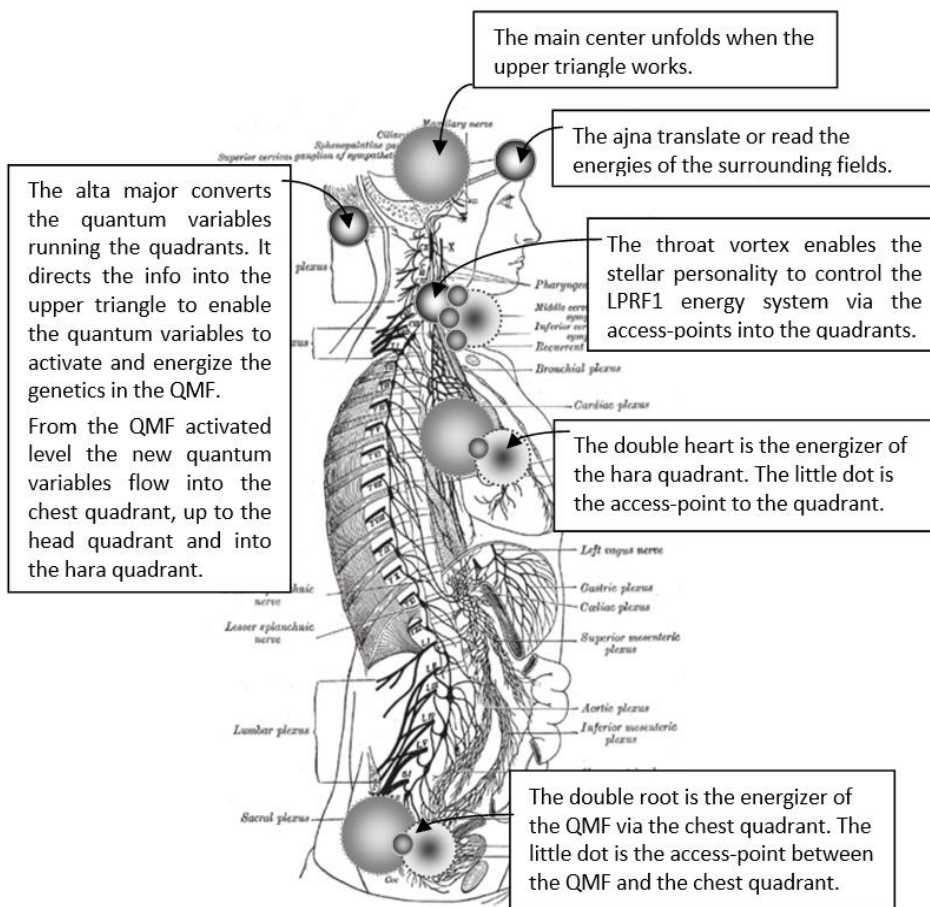

The artificial 4<sup>th</sup> and 5<sup>th</sup> dimensional energy currents that arise from the inserted regressed genetics (earlier called the quantum variables) have their connection points to us via *the quantum morphogenetic field* (the QMF), which is the foundation of the lower order bio-field.

The goal of the artificial energy currents is to circulate the transformed regressed genetics into the upper and middle section of the template and the transformative energy system, and by that use this function to repair their genetics. The three quadrants are part of that artificial harnessing system.

Via the quadrants, the inserted alien genetics and their programs link the TES to 4D semi-organic clones in the artificial 4D sectors within our solar system, or to 5D augmented reality programs with false timeline scenarios where a holographic representation of us would exist within different augmented reality programs consisting of false timelines in order to generate the needed genetics usable for the Colonizers.

## The Central Binding Areas (the CBAs)

The illustration below shows the three main holographic overlay vortices and their counterpart CBAs. Quantum Variables are combinations of regressed genetics and their distorted energy currents.

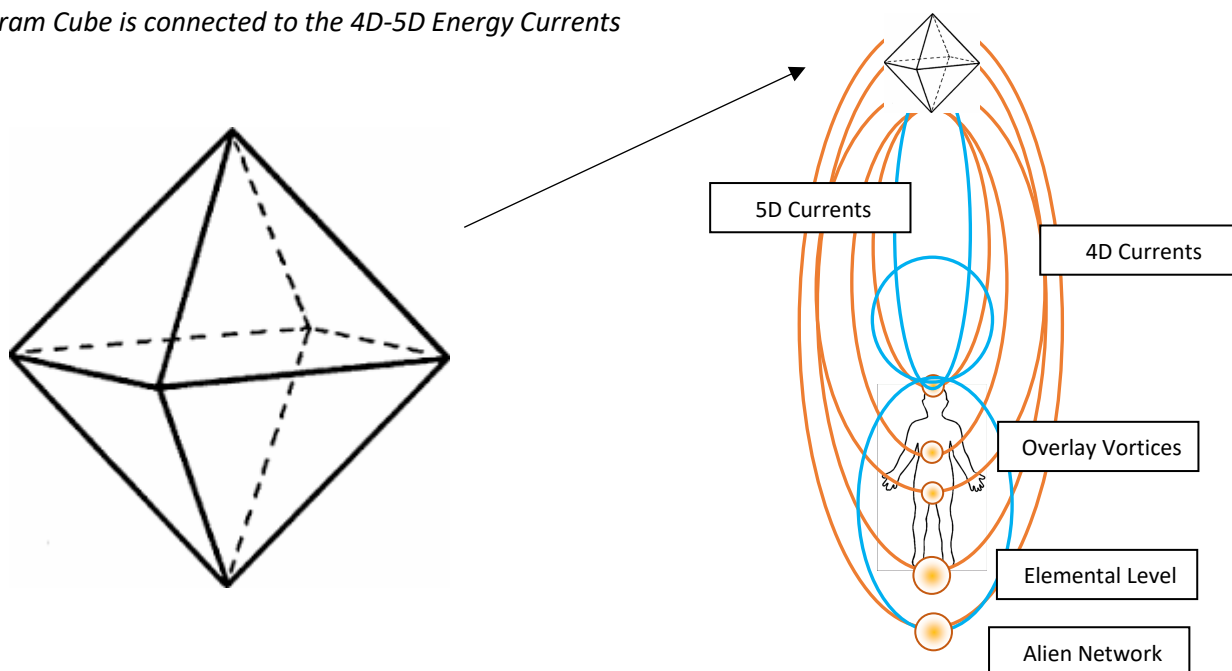

# The HAL Academy – The ACW of the IAT Quadrants Course 4

## *The Three Quadrants in Overview*

- The central binding areas (the CBA) compose the three quadrants that fuel the holographic overlay energy system.
- The quadrants produce the energies that force the transformative energy system to produce artificial 4D and 5D energy currents.
- *The hara quadrant* fuels the bio-field to be able to hold electrochemical compounds, distorting the original code systems of our molecular bio-field. This lower order type of field can then house the emotional field, which in essence is alien to our natural energy system.
- The middle levels of the LPRF2 regressed network unfold combinations of regressed genetics and their distorted energy currents (aka quantum variables). These are pulled into the heart field via *the chest quadrant* and by this, instead of producing the correct vibrational energies to fuel our Chiasm, the regressed technology harvests what we were to produce via the Chiasm and our original transformative timeline work.
- The upper levels of the LPRF2, and into the LPRF3 networks, unfold combinations of regressed LPRF2 and LPRF3 genetics and energy currents. These are pulled into the brain field via *the head quadrant* and by this distorting our mind-field to be able to link up to the artificial AI 5D Cube programs.

*A 5D Program Cube is connected to the 4D-5D Energy Currents*

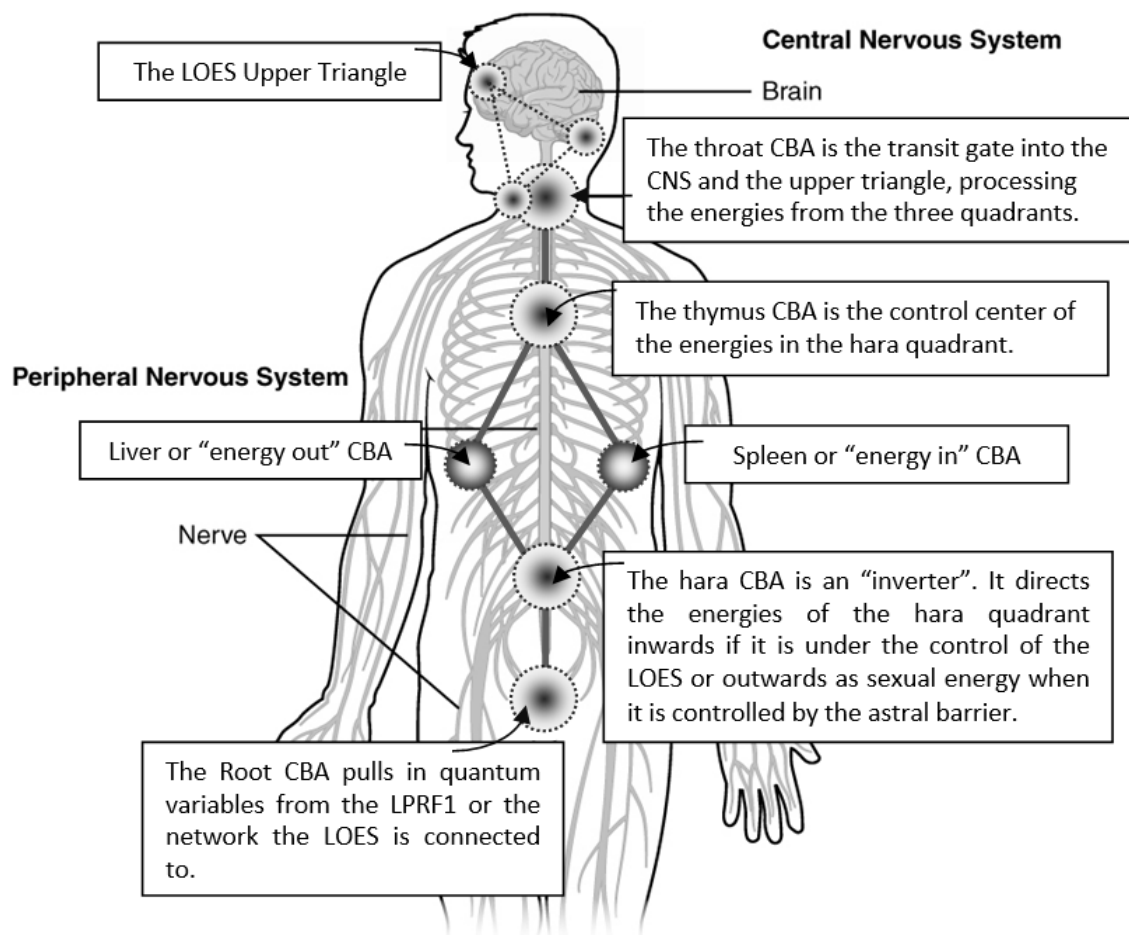

# The HAL Academy – The ACW of the IAT Quadrants Course 4

## The Three Quadrants Explained

1) *The Hara Quadrant* produce the energies of the PNS and the electrochemical compounds, controlled by the energies of the CNS. The hara quadrant is the producer of the lower order emotional field.

### The CNS, the PNS<sup>32</sup> and the Hara Quadrant

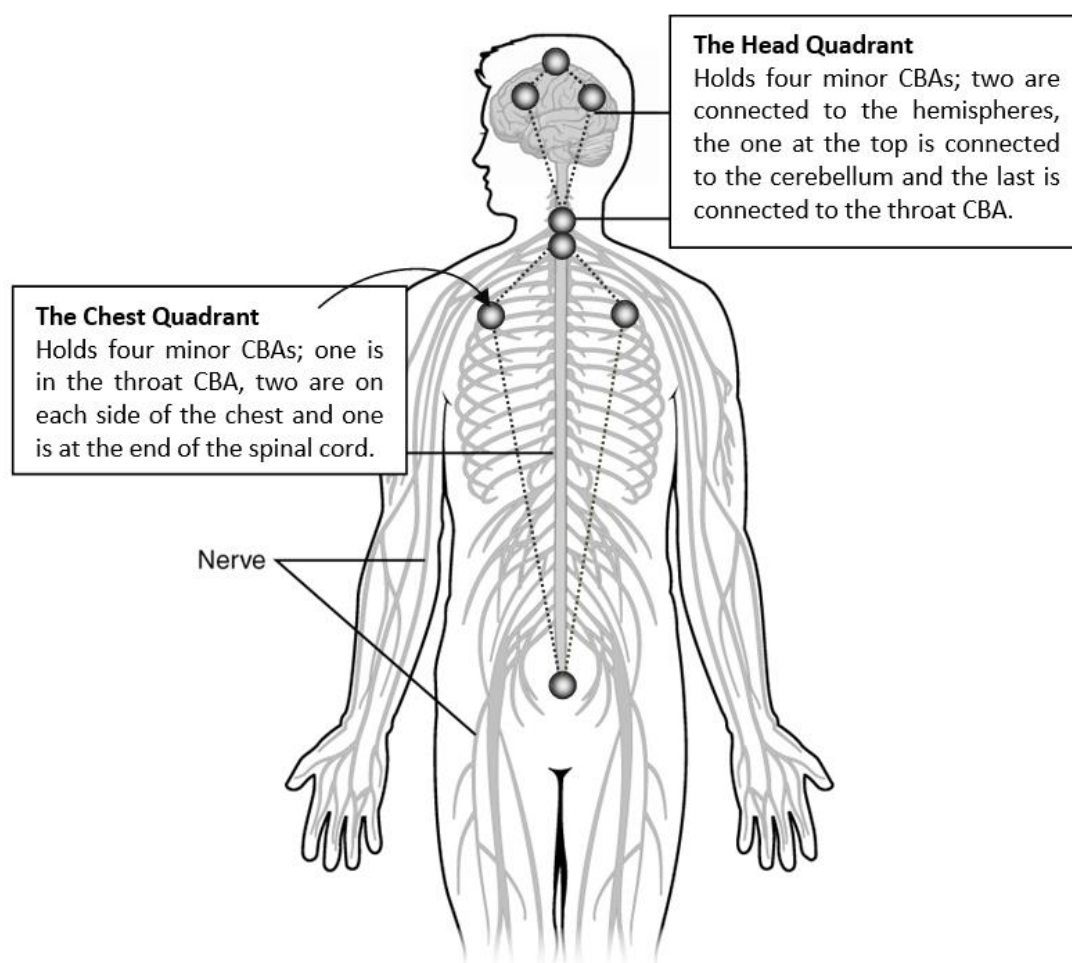

**Quantum Variables are combinations of regressed genetics and their distorted energy currents.**

The throat, thymus, hara and root CBAs have a core of high frequency CNS energies and a perimeter of lower frequency PNS energy. The CBAs behind the liver and spleen circulate the energies from the root CBA in a horizontal spin. The throat-root CBAs circulate as a pair in a vertical spin and the hara-thymus CBAs circulate in a vertical spin too. The QMF is fueled by the gonad-ovary triangle.<sup>1</sup> The goal of asceticism is to ensure that the QMF provides the needed settings for the LPRF1 energy system. When the quantum variables of the QMF are utilized as sexual energy, the reconstructed energies cannot reconnect to the LPRF1 energy system.

<sup>1</sup> The gonad-ovary triangle in females is positioned between the ovaries and the root CBA, i.e. the downward triangle as the energetic symbol for females. The gonad-ovary triangle in males is positioned between the testes and the root CBA, hence the upright triangle as the energetic symbol for males.

## The Other Two Quadrants

*The Chest Quadrant* processes the quantum variables of the middle levels of the LPRF2 network. It is via the chest quadrant that the integrated genetics of the LOES are transferred into the quantum morphogenetic field (the QMF) and from this “take on” energetic similarity to the LOES and its stellar-solar personality. The genetics, which are activated by the chest quadrant, are the LPRF2 kind of genetics such as the insectoid, avian and reptoid (mammal).

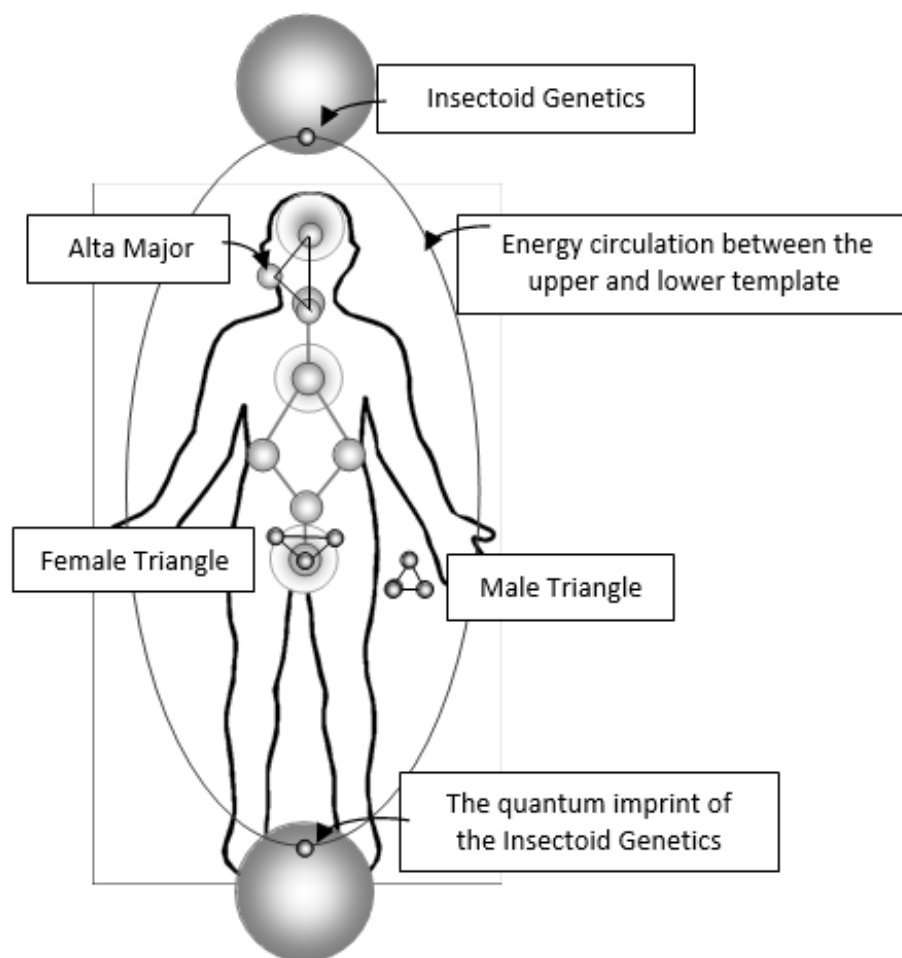

*The Head Quadrant* processes the quantum variables of the upper levels of the LPRF2 network and the higher DE2/LPRF2-DE3/LPRF3 genetics. However, the head quadrant also processes the consciousness level of the LOES via the upper triangle projected into the QMF (the LPRF1 reality network) and from here controls the energies in the CNS. When the head quadrant works, it is possible to generate more density energy to fuel the synapses and neurons in the brain due to transformation of the quantum variables into density energies via the chest quadrant, the heart field and the Chiasm, producing the higher order vibrational energies, and then transferred via the throat CBA into the head quadrant allowing it to connect to the holographic teaching systems and the simulation programs to repair the original genetics inserted into the transformative energy system.

*The three quadrants are interconnected via the throat CBA. Thus, the throat CBA is the key CBA to all of the three quadrants.*

## Activation of the Quantum Morphogenetic Field

The first level of the activation is the quantum morphogenetic field (the QMF). The two quadrants, processing LPRF2 quantum variables, begin as blueprints in the QMF. The two quadrants are thus built out of dormant template genetics. The insectoid genetics are the building blocks of the QMF and fuel this to be able to function in the lower LPRF1 areas.

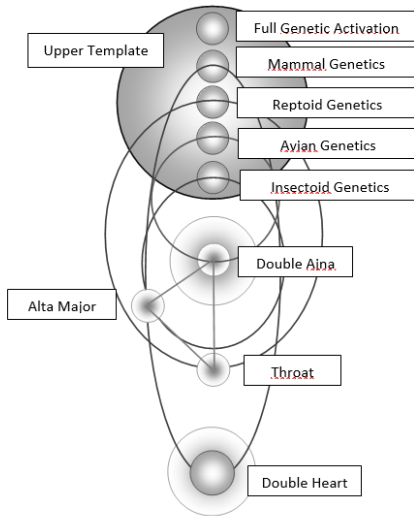

### The Insectoid Genetics and the Gonad-Ovary Triangles

# The HAL Academy – The ACW of the IAT Quadrants Course 4

The *template reading* gives the first layer of the memories that are to be processed and integrated to move further into the activation process.

## The Upper Template with Auric Fields

The auric fields, i.e., the energy currents, have to process the correct type of quantum variables to activate the upper template and release the genetic content, kept on specific levels of the upper template, cf. the illustration above.

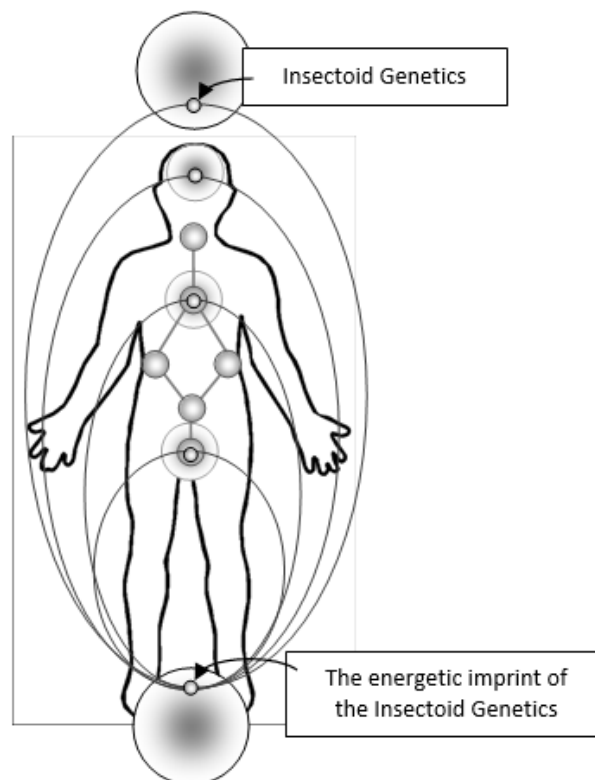

As we recall from course 3 – the inserted holographic overlay regressed genetics inserted into the upper template, overwriting its true purpose and function as part of the transformative energy system. Each layer is connected to the currents of the different genetics, as explained in video 10.

The auric fields are the energy currents of the 4 types of regressed genetics; insectoid, avian, reptoid and mammal.

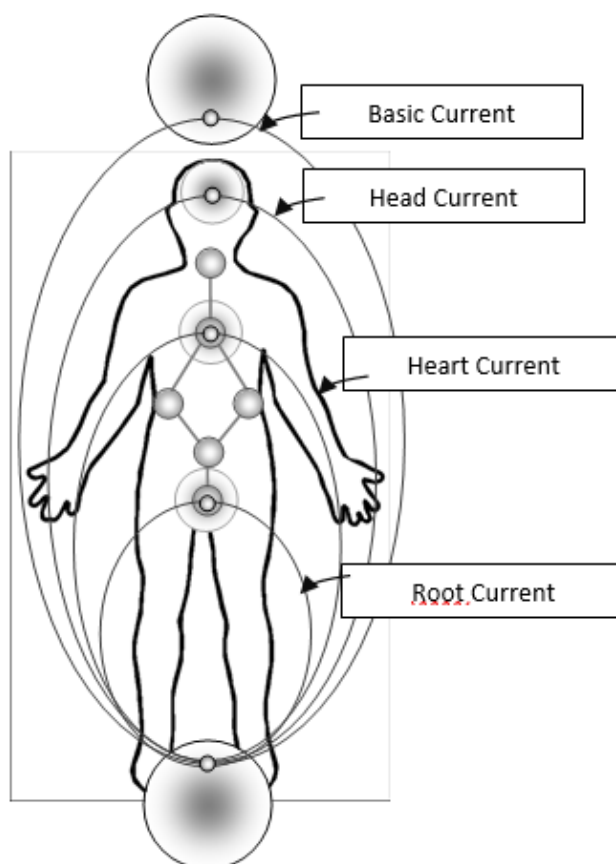

Go back and watch course 3 again after this course and understand it within the full context.

The *quantum morphogenetic field* is the encoded field that produces the LPRF1 energy system and the organic form. It extends around the LPRF1 energy system and organic form. The QMF is controlled by the alta major in the upper triangle. Changes in the alta major adjust the QMF to fit the energies of the rest of the resonance system.

## The Quantum Morphogenetic Field

### The Currents of the Quantum Morphogenetic Field

### Using Self-Scan and Code-Repair in the Work

*Step 1: The ability to self-scan and code-repair the energy fields to clear out code systems of a lower order*

- I. What is perceived from a normal awareness level?
- II. What is perceived from a double awareness level?
- III. What is the energetic information behind from a higher order awareness level?

*Step 2: The ability to achieve energetic transformation in the two energy systems*

Firstly, answer what you think it means to achieve energetic transformation of the two energy systems.....

- I. From a normal awareness level?
- II. From a double awareness level?
- III. From a higher order awareness level?

Then ponder upon how you can achieve this energetic transformation in your daily energy work.

*Step 3: The ability to achieve a higher vibrational-radiation states in the brain and heart fields*

Firstly, answer what you think it means to have a higher vibrational or radiation states in the two fields.....

- I. From a normal awareness level?
- II. From a double awareness level?
- III. From a higher order awareness level?

LPU Genetic Template
