

# The HAL Academy – The Template Sciences Course 2

*We continue the work that was instigated with the Restoration Program (the ATE Pillar Project) and the attempt to repair the original lineages of our reality. Of course, reality has changed since then (and the mission as such failed) and lots have been done to our template under the forces having their projects here, but to be able to reconstruct our template, using whatever viable genetics we have got left, we need the to understand the original construction first, why it was made and what its purpose was.*

The HAL Transition Sciences and the Advanced Clearing Work Courses must have been completed, since they provide the background for this series. The course also builds upon earlier material, although taking it to the next level.

## The DE1-LPRF1 Reality Fields – the Foundation of the Artificial Energy Systems – Now Resetting

*Our reality is surrounded by concentric circles of distorted energy. And then we have our outer world as well. From the earlier HAL material:*

# The HAL Academy – The Template Sciences Course 2

*The gridworks and networks in the new reality fields after the Resetting of our entire system is completed. Of our interest are human groups 1-3.*

The illustration shows how gridworks turn into networks. A gridwork is the central racial field of a LPRF holding the encoded energy units as well as the plan for that reality field as it was laid into the gridworks by the Progenitors. Only when the genetics link up to a gridwork are they able to progress.

*The concentric domains as they unfold into our reality in density settings, where each domain covers several sub-fields, as explained in the HAL Books.*

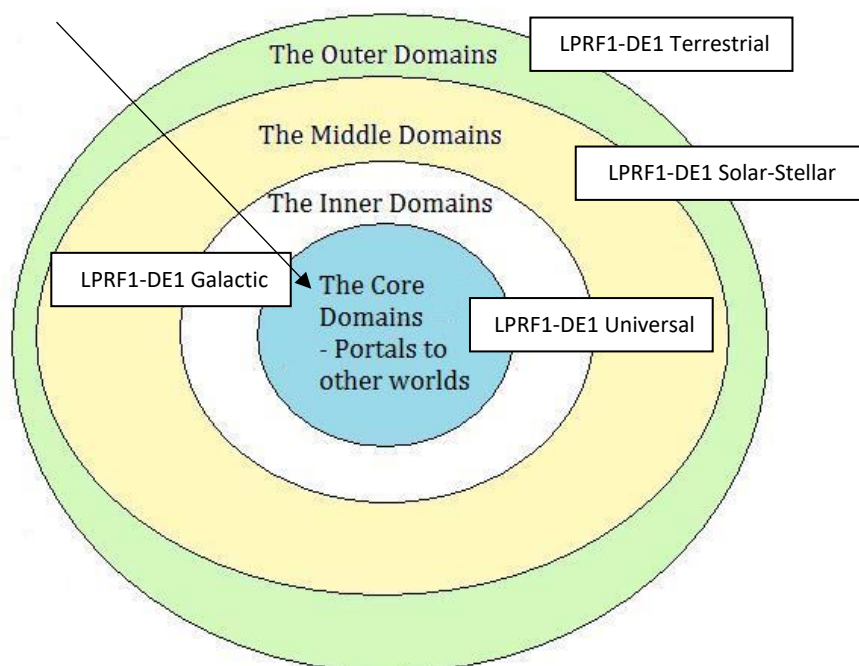

## The Domains

The Core and Inner Domains permeate the Middle and Outer Domains as radiation and vibration.

All Creation unfolds from within and outwardly; not from the outside and in.

The Three Principles are the basis of the Core Domains.

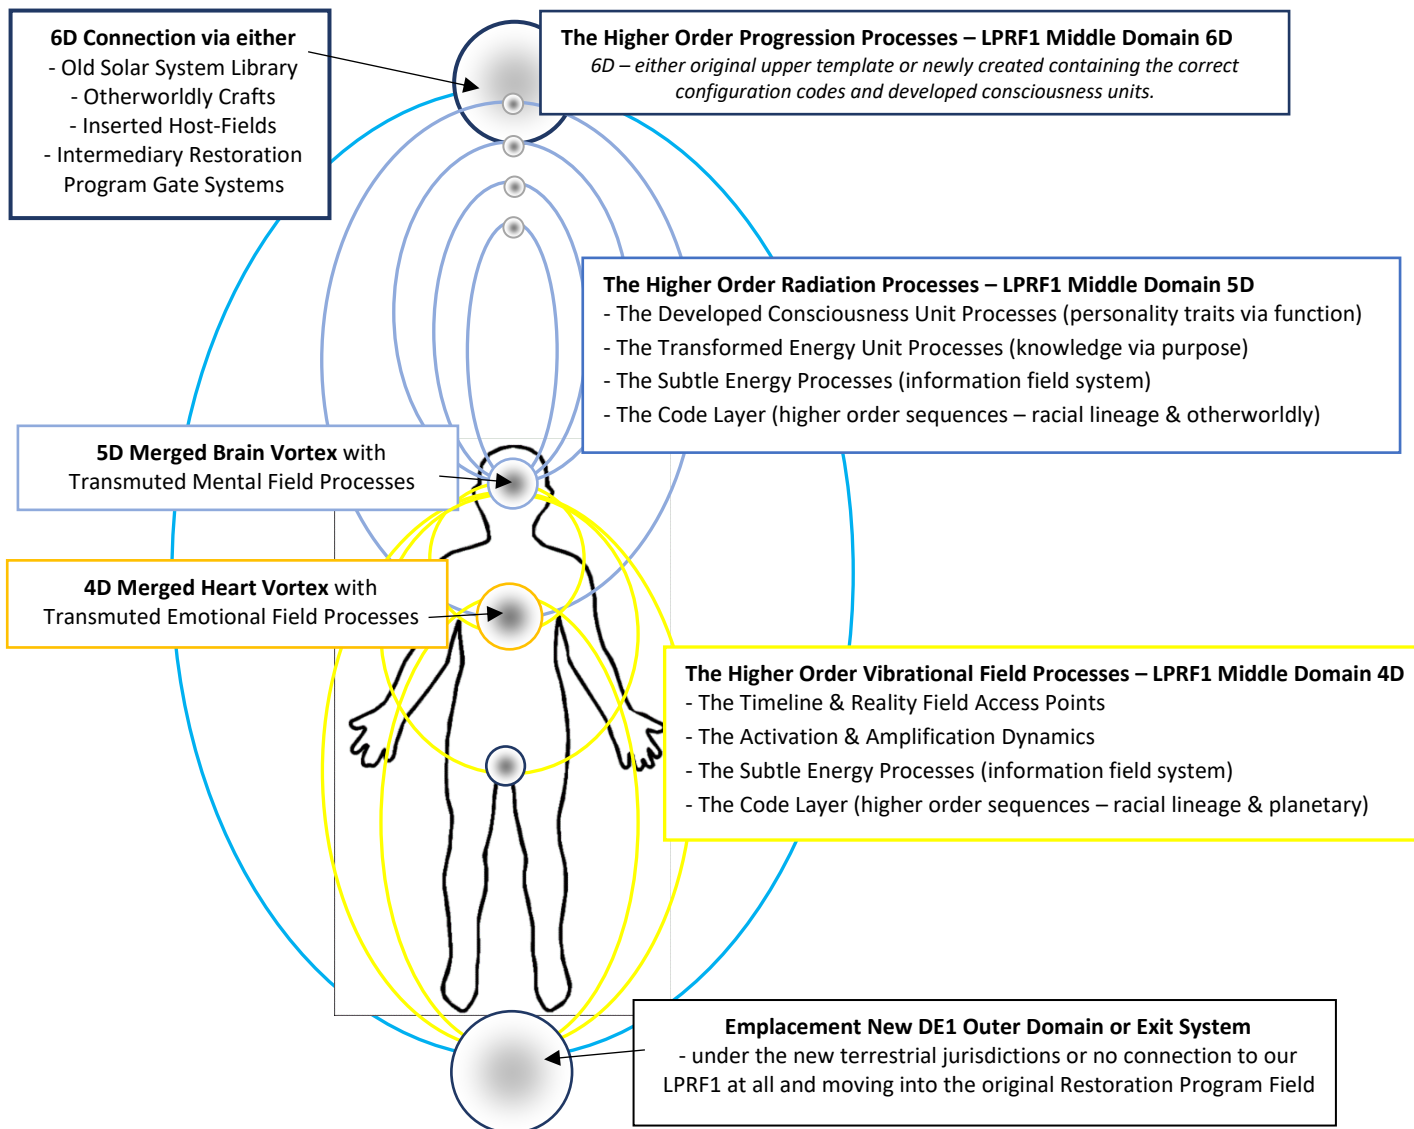

The Inner Domains are the areas of the True Worlds.

## The Higher Order Transformative Energy System in the LPRF1-DE1-OD

*The higher order energy system can be viewed as multilayered composition of several energy fields with different access points, energetic orientation and processes of consciousness and energy. It expands from the personal experiences into the reality fields of similar forms of energy fields and consciousness processes.*

*The higher order energy system is thus a composition of the processes of raw consciousness and energy units to be developed and already transformed consciousness units (the CUs) and energy units. The goal of these processes is to develop new forms of existence.*

## Introduction to this Course

On June 2022, the second “horn” sounded. The first one sounded in 1999 kickstarting the stellar activation and clean-up cycle, and now the second horn has sounded, kickstarting the planetary activation and clean-up cycle.

Thus, it will serve our purpose to take another look at the New Grand Cycle activation and clean-up stages, since we learn more and more as the process unfolds, giving us the complex information, we need to be able to follow the stages.

## The Original Pillar Project Developmental Programs

In the old progression worlds, there were no teachers of progression, since every human could - at all times - connect to the holographic teaching systems (the HTS) and there get the results of any choice to be made according to the Principles, the Rules and the Laws of that system, i.e., how the reality energies would work on the template in that type of density and reality, if we made that choice.

The HTS were interactive and simulated possible scenarios according to the template, we had constructed and what we had decided to achieve in the system, we were part of. Furthermore, the HTS interacted with the chiasm, showing possible outcomes on all holographic levels of the reality field.

If the possible futures were not suitable for our continued progression, we would change our ways or recode our code sequences to fit the system, we were part of in a better way.

We utilized our consciousness to do so, since we were the ones that had engineered our template and energy system, when we entered that system. Thus, if our template did not work, it was our responsibility to fix it.

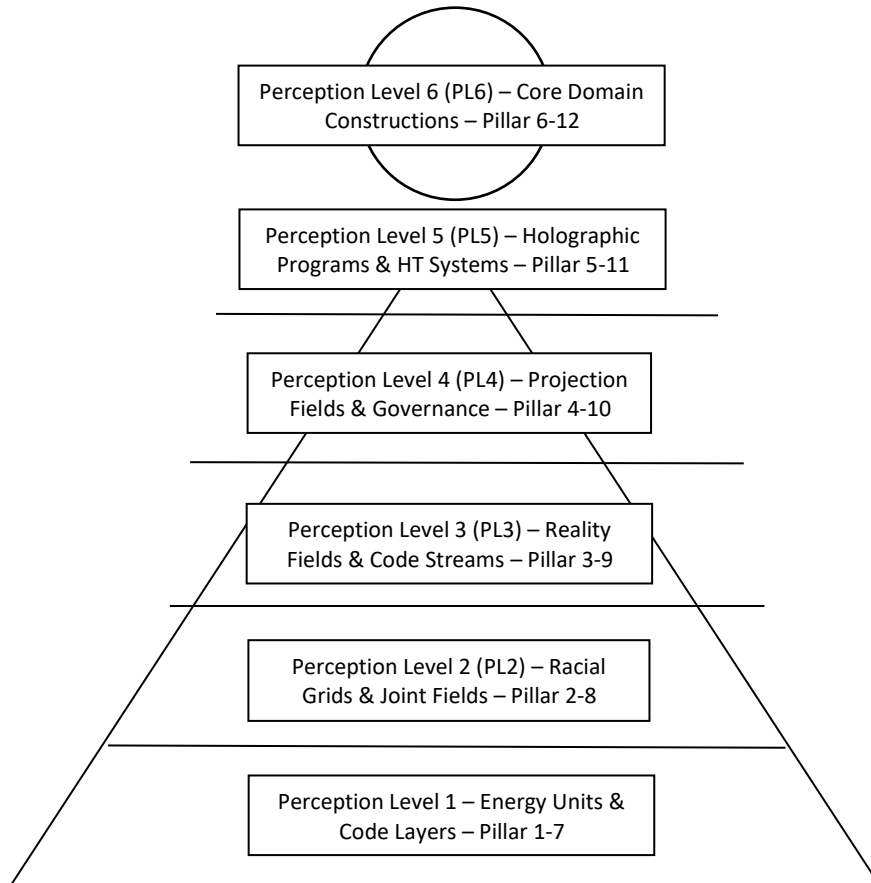

*Consequently, we are the only ones knowing how our template works and how it is engineered in detail. This is important to understand, because the underlying coding in everything we are, is something we have engineered. We learned that in the first two pillars.*

*We are sovereign in all that we are and we do not need teachers to make us become whole again. But we need other lifeforms and surroundings to mirror to us what we are, so we can self-correct and self-adjust. And, as things are now, humans that resonate with us on the same level of work.*

## The Higher Order Information Systems as Developmental Processes

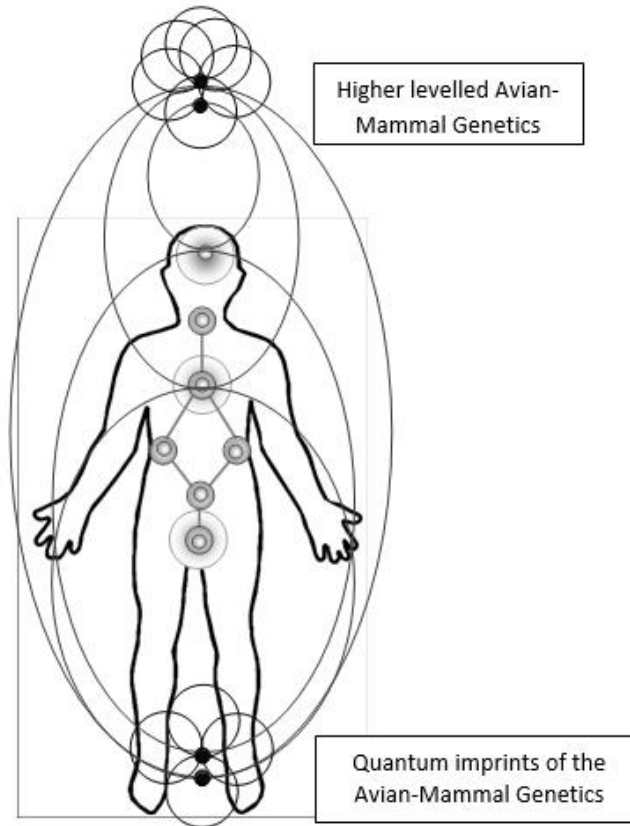

In the work with the energetic-dynamic cycles of the concepts of spheres within spheres and probability fields we work with different perception dynamics such as the psychic-energetic sensing and higher order cognitive abilities. We recall the 6-step ladder of perception dynamics to unravel the complex information system we are addressing:

1. Linear psychic-energetic sensing and higher order cognitive dynamics investigating the item from the perception process of sequences of units (Step 1 of the perception dynamics).
2. Processual psychic-energetic sensing and higher order cognitive dynamics investigating the item from the perception process of opposition dynamics (Step 2 of the perception dynamics).
3. Systemic psychic-energetic sensing and higher order cognitive processes investigating the item from the perception process of synergetic dynamics (Step 3 of the perception dynamics).
4. Information system psychic-energetic sensing and higher order cognitive processes investigating the item from the perception process of holographic dynamics (Step 4 of the perception dynamics).
5. Coding and decoding psychic-energetic sensing and higher order cognitive processes investigating the item through perception processes of complex code information systems (Step 5 of the perception dynamics).
6. Integrative psychic-energetic sensing and higher order cognitive processes investigating the item via replication dynamics (Step 6 of the perception dynamics).

# The HAL Academy – The Template Sciences Course 2

In our individual progression work, we knew, we affected the racial consciousness units and thus, we always developed our genetics in unity with the dynamics of interconnectedness, following *the Law of the One*, which means that if one can do it others can too, because everything we do gets implemented into the racial genetics. We also learned how to apply our knowledge and skills to accommodate for the highest progression rate of the system, we were part of. After completing the 2-8 programs and their cross-programs into the community work, the next stages of the progression work were exclusively within the 3-9 pillar, where the main focus was on how to manage the governance programs administering our reality field, how to adjust the grids and how to maintain the resonance fields.

In pillar 3-9, we learned how to apply the Natural Laws of Energetic Utilization into our progression work.
