Disclaimer

The information in this article is seen from a density 2 (D4-6) level, for short DE2, and not within present-day density 1 (D1-3), for short DE1, timeline event driven sciences. The background of the information given here is to be found in the HAL Philosophy book and partially in the Souls of Humanity. Also read the free material on the website under the HAL Project.

The Setup of Our Reality

Our reality is surrounded by concentric circles of distorted energy. And then we have our outer world as well. From the earlier HAL material:

The Emplacement in 2020-2021

While the NGC is doing its work with the grids and resonance fields, upgrading and changing these in the last section of the 3-9 pillar completion cycle from 2020-2025, the councils have instigated *intervention protocol* to ensure a correct completion of the activation sequences and pillar cleanup.

This is contrary to what happened in the activation cycles of the 5-11 pillar and the 4-10 pillar, where the higher order councils trusted the regressed to follow the design of the completion cycles. Instead, as we know, the visiting regressed extra-systemic humanoids and the remaining intra-systemic races relooped and halted the completion cycles to the infinite, in order to prevent the incoming energies of the NGC to get grounded into the grids.

The Emplacement 2020-2021

Randi Green © 2020

And, at the same time, the regressed races prevented all humans, living within their jurisdictions, in doing the activation work that could have gotten humanity much further in their awakening process and by that would have been able to contain the energies of the NGC.

Therefore, the years 2020-2021 unfold under the intervention protocol to allow for the NGC energies to do their work, which means:

- Seclusion of jurisdictions belonging to the regressed races and by that keeping them within their own grids. This stops them from entering the reality zones and areas, which can absorb the NGC energies and in that assist our reality in upgrading.
- All human-humanoid programs will be shut down and humans with hybrid templates, will be cleared of the engineered genetic combinations.
- These humans are reinstated genetically into what the template indicates of original content, before the overlay genetic hybrid insertions. The rest is for the human to clear out.
- An isolation of the human mental field, the emotional field and bio-organic field to avoid any further interruption of a possible awakening processes. By isolating all humans within their lower fields, they will not be exposed to parasitic or energetic transfer from other humans. Every man and every woman can then work with what is truly his or hers.
- Along with massive infusions of energy to activate the resonance grids in the different segments.

Following the years in 2020-2021, humanity will be emplaced into *the 5 reality zones*. The calculation for this will be according to what they were before the timeline event, what they have become and what they have the possibility to activate. We will then have humans within the 5 groups:

1. Humans with regressed templates and genetics, and therefore in essence are humans with regressed souls aka a regressed.
2. Humans and templates that will phase out under the extinction protocol, because they hold no viable genetics.
3. Humans that will try and make it in the DE1 i.e. all humans not aware of the higher order worlds, or the regressed worlds.
4. Humans working to enter the rehabilitation zone and afterwards doing the work to enter the progressive worlds within the pillar, they belong to, when their rehabilitation work is done.
5. Humans that knowingly continue the progression work, they got derailed from during either Atlantis or Lemuria and by their own accord can work their way back into the 6-12 pillar.

After 2021 all templates and energy systems (and thus humans) will be emplaced into the 5 reality zones according to what they appear to be energetically, genetically and according to the pillar level, they reached a long time ago. This will determine what is to be relearned to meet the NGC requirements. The sum of genetics that can activate and their forms of energies are calculated to emplace the template and its code sequences into the correct segments.

After 2021 we can change our emplacement by doing the work, but it will become increasingly more difficult as the NGC completes its sequences.

The Emplacement 2020-2021

Randi Green © 2020

The 5 Human Reality Zones

To ensure the most optimal result of the NGC, our reality, templates and energy systems have been divided into 5 reality zones to provide the best chances of continuing within the progressive realities.

Humans will be emplaced into the reality zone, they belong to. This can be figured out by observing what is happening in and around them, as well as to what degree the incentive is to do the awakening process, the level of self-reached information and the ability to do advanced energy work. The more viable genetics there are in the template, the more natural a self-instated awakening process is. The left and right follow the chiasm.

What World Do We Want?

What type of world do we want? We must begin to build our matrix of change (how to do this is part of [the NGC Transition Courses 1-4](#)) and develop a higher order perspective of our reality. We need this to truly get the full implications of what is going on here. We have to learn about energy and how to develop all that we are into a higher awareness human. We are not just up against a human world gone wrong here - it stretches far beyond into other systems and their eagerness to get access to our world.

We can only change the world, if humanity changes too. Being what we are now will not face up to what is brewing. We need people educated into the higher order sciences. Aware humans knowing about energy and consciousnesses. People who are able to work with the holographic grids and not just by mechanical means. but by the use of original human knowledge. To name a few of the needed acquirements.

The world needs new ways of being human. At the end of the day, we will all have to focus on one line of thought and not taking part in all of the systems out there. The Law of Participation ensures that, including the law of energetic and genetic affinity. So, that is another one for us to take a stand on - which higher dimensional future do we believe in? And which factions do we want to invite into our world by the teaching systems, we are part of?

From my end - none of the current systems. I want humanity to become what they once were, i.e. the 6Ds - and what we tried to accomplish here before the ones, we tried to help began to think it was their solar system to take. That was their way of giving thanks. So, no thanks to them and their agendas. They should all leave. I do not want them here anymore.

I fight for the original progressive world, we once were part of and can get back to again, if we do the progression work. Not the downsized version, we have now but the one we can develop into, i.e. a future 6D world run by the original progressive Principles, Rules and energetic Laws. I do not fight for some flimsy other world in another system, or endorsing any ideas that make our solar system a new other-dimensional colony for races from other systems.

What Can We Do?

Educate ourselves and become a higher order human, functional in the DE2. The HAL Philosophy book and the NGC Transition Courses 1-4 will give further information regarding what can be done. Then, the HAL Educations will work with the DE2 topics to find solutions and methods to work with the changes. And naturally, the HAL Classes & Courses to get started. How to get started – [click here](#).

Introduction to the HAL Project Worldwide

In the big perspective of things, we need to change the ways we have arranged ourselves and the ways we utilize our planetary and natural resources. Science anticipate that all energetic changes in our reality run in a linear fashion, probably because they view our planet as a closed environmental system with few and limited feed-back dynamics, and they have in-calculated that in their prognosis of the changes to come and how much time humans have got to do the transition.

However, the energetic changes do not run in a linear fashion, given that they are the manifestation of extra-systemic energies from other-dimensional realities. All of which are levels of reality, science do not understand yet, let alone that these dimensions affect our world in higher order scientific ways. Hence, every single calculation done by sciences, building upon a worldview of few dimensions of reality, are more or less incorrect.

All energetic changes, such as erratic weather patterns, the ebbs and flows of the water tides, the energies in volcanic activity, the movement of the tectonic plates, the subduction mechanics, the possibility and probability rates in the quantum fields, the magnetic polar shifts, the solar cycles, the virtual discharges in atomic fields and appearances of new clusters, the cyclic changes in nature, the development and mutations in lifeforms, the opening and closing of dormant DNA, the bacterial and microbial activation and similar micro and macro energetic systems, are all governed by the extra-systemic cycles of change.

The extra-systemic cycles of change originate from realities beyond present-day understanding. Realities composed of other-dimensional worlds and density systems inhabited by advanced progressive human and the humanoid races, living in highly advanced systems beyond the accepted level of science. Our universe might look depleted and devoid of any forms of life, but only in the atomic section of it, i.e. the accepted 3rd dimension with the dynamics of space-time, relativity and the speed of light as the ruling vectors of change.

The extra-systemic cycles of change run exponentially and cycle in and out of our field and matter reality,¹ amplifying each other when they enter. And this time around, they carry with them the energies of the NGC. *The extra-systemic energies*, behind and driving the cycles, build up and reinforce similar energies in other sections of the fields, be it on a quantum, atomic or molecular level. In the beginning, the extra-systemic energy appears with unnoticeable changes in selected nodal points within the minor grids, in a series of smaller cyclic changes, and later on with major cyclic energies into the main grids.

The extra-systemic energies can be alleviated and implemented to generate productive changes, and allow for higher order levels of reality unfold. This is the natural way in all progressive systems. Progressive systems are built upon changes, and the willingness to instigate changes. Contrary to our current world setup that is built upon status quo systems to keep our solar system stuck in the density 1 (D1-3). Therefore, if the smaller cycles of change are not met in the accurate manner and implemented into the energetic fields governing our reality and additionally integrated into the human energy system, and

¹ Our reality is made up of fields of energy, which are holographic in nature. The holographic resonance fields hold the possibilities to unfold as energetic waves or particles, i.e. the code systems to generate light and matter. Change the code systems and the properties of waves and particles will change from their density 1 version (D1-3) into a density 2 (D4-6) version, where waves and particles can take on 4th dimensional features. Once that happens, the human consciousness-energy interaction potentials will be restored.

The Emplacement 2020-2021

Randi Green © 2020

utilizing the extra-systemic cyclic energies for individual and collective progression,² the incoming energies of the major cycles will build up to disruptive heights and instead of instigating the long-needed changes, they generate disaster. Which they already are. And, there are several cycles of change to be completed in our solar system in this present age, given that the old systemic cycles are coming to an end.

Subsequently, our reality and all that is in it do not change in a step by step manner, where humans can do what they need to do in the slow pace, they prefer. It changes accordingly to the larger extra-systemic changes beyond our human control. The only thing humans can control, is to follow the great leaps of change or to resist them.

Nonetheless, as we know, selected groups of humanity have been in for a rough awakening for some time now, although any attempted implementation of the extra-systemic energies are moving far too slow to meet up with the systemic changes. Mainly because most of these good-intended groups were used by the extra-systemic races in our system, which are not really in for the changes, but knew they had to face up to some of them to keep status quo and to be able to control the incoming energies.³

We are seeing the effects of the none to incorrect implementation now – and more disruptive occurrences will arise within our reality as the extra-systemic energies of change escalate exponentially, especially as long as there are no humans to implement the energies correctly. This is how it works.

At the same time, we are also struggling with the lesser forces operating within politics, national economics and the administration of planetary resources. All of these areas have been governed from a perspective of restricting any forms of real progress to maintain status quo and the power systems of the leading factions. They would rather let our world run to point zero than given over their power.

However, none of this takes away the individual responsibility of every man and woman, having accepted the circumstances and what was offered to them from the human lineages in power. Humans have willingly participated in the world show, enjoyed the ride and willingly given away their power of influence.

Nevertheless, all things must come to an end or change, and so must the merry-go-round of the anti-progressive world leadership, the greed run big businesses and the comfort zone ways of living, humans have accepted so far. All of which are the essence of humans living with their head in the sand, or as we say it in Denmark; with their head under the arm.

² All of my work is an attempt to teach these sciences.

³ The anti-progression races could control the extra-systemic energies when these entered into the minor grids. A delay that was done by relooping the reality grids into a previous probability rate of energy (a previous branch of the timeline). But when the energies will hit the major grids in the years of 2020-2025, it will not be possible to halt the dynamics or delay any further. As the major grids begin to activate and reset, all of the nodal points in the timelines belonging to the old cycles will dissipate, including all branches of alternate realities. A fact that has led to a huge withdrawal of the other extra-systemic races, taking off while they could. However, since our universe is part of a very big universal community of races, there are still many of the lesser progressive races left in our system doing business as usual as long as they can.

About the HAL Project

Our world is bigger than we think and we need to incorporate that into our world perception to truly grasp the higher order sciences such as the understanding of our reality field, including the many energetic laws governing us and our world, unfolding the full version of our reality. If we continue to exclude these levels of our reality from our perception and understanding of our solar system, we will exclude our chances of new perspectives, alternatives and solutions to a better future for us all.

The contemporary human perception will not give us the needed solutions to the transition challenges, we are to face in the upcoming years within all levels of society. Solutions to generate the higher order sciences, in order to solve all health issues, the climate changes, and the environmental challenges along with the transition challenges, instigated by the new grand cycle, within all areas of human systems and structures. The years to come will alter all aspects of what it means to be human in this world.

The Changes to Come

Humanity are to adapt to the energetic changes and learn to live in energetic flux as the other dimensions become an integral part of our perception of reality. We are also to learn to administer the effects of the past, the present and the future in our daily efforts to follow the Principles, Laws and Rules, which originally governed our world.

With the HAL Project, we will learn to focus on the world we have vs. the world we want and how to build it using the Principles, the Rules of Engagement and the Natural Laws of Energetic Utilization to do so.

Humanity has to develop a new awareness based upon an interactive reality, with new sciences, with new concepts of energy and matter, and the awareness of higher order realities. With the higher awareness lifestyle (HAL), changes are bound to unfold in the human inner and outer perception field and develop the psychological faculties, altering what it means to be human.

The Vision for a Better Future

The goal of the HAL Project is to inspire and to develop the higher order awareness in those who are interested. The HAL Project will lead humans into having a progressive, communicative, developmental and environmental awareness, able to do their own creational projects or create new business projects to manifest the possible highest order reality into our world, for the highest good of the many.

The Inner-Outer Human Evolution

1. The understanding of self and our reality must change to be able to follow the incoming energies of the new grand cycle.
2. New perspectives have to be offered so new purposes for the continued evolution of humanity can unfold, into which new business, creational and personal projects take part, together with a future vision from where the strategies can be defined to reach the goals.
3. Productive solutions and adaptable new ways of being human have to be offered, showing humans as part of a higher order human race in a joint evolution towards a new reality, we will build using these new sciences and understandings.

The How

The Emplacement 2020-2021

Randi Green © 2020

- 1) The offered possibility to do the human transition by changing the bio-field, the emotional and mental fields into the higher order energy system, composed of the vibration and the radiation fields.
- 2) Developing new forms of energy work to reconnect to the original progressive ways, using the Principles, the Rules of Engagement and the Natural Laws of Energy Utilization.
- 3) Develop creational projects and produce small businesses where the HAL Project can be unfolded into manifested reality with the goal of generating a higher order society, based upon higher awareness. This includes generating a better environment for the future humanities and their evolutions, expressing this into a purposeful life, while working with consciousness and energy.

The HAL Project in Australia, Europe and America

As the extra-systemic energies hit the major grids in the 3-9 pillar final activation stages, along with the following completion cycles of the racial and individual levels of our reality in the years to come, active transition work is demanded to alleviate *the activation and cleanup processes* of the reality grids all over the world and the subsequent effects on humans, nature and all lifeforms.

This work is not only from a tangible mechanical perspective, but also from an energetic level enabling all lifeforms to be able to contain the new energies and what to do with the new ways of being human and the new ways of being bug, bird and animal⁴ etc. And we can lessen the effects of the racial and individual activation and cleanup cycles, if we educate ourselves into how to do this work.

The alleviation and transition work can only be done by educated progressive humans having the highest purity rate (a transformed high-energy organic vessel), the highest standards (transformed and upgraded vibrational field to match the standards of the progressive worlds and how they interact energetically with self, others and reality) and the highest progression rate (transformed and upgraded radiation field to grasp the higher order holographic-technological sciences and how to govern reality, develop grids and administer consciousness genetics in all lifeforms, including how to transform nature into holographic-density settings).

Thus, there is a need for people who are willing to do *the HAL Progression Work* to develop themselves into a new type of human. Or more correctly, return to their true human self. As long as humans are having the incorrect understanding of who and what they are, including the deceptive and incorrect ways of working with consciousness and energy, they will have a useless understanding of self, others and of reality.

We need humans that are willing to learn and exercise the progressive ways. And who are willing to do the years of education it takes, the years of timeline and clearing work it takes, and the years it takes to change their ways of being human on all levels of their being. That includes the work with themselves, others and reality.

The HAL Philosophy

⁴ Since all animals are built more or less similar to the human organic form, the energies of the NGC will also invoke changes in them. This means more advanced brain capacity and emotional upgrading. Not that animals will talk – but they are telepathic and it is just a matter of taking the time to work with them, before they will develop these abilities. Following that, the consummation of animals will end. Finally.

The Emplacement 2020-2021

Randi Green © 2020

*The HAL Philosophy is generated to create the information needed to understand the new ways of being human – as far as it is possible with our contemporary belief systems and scientific comprehension level. Including pushing to the surface the collective notion of the times, we were part of the Workstations and how we all used to do the universal pillar work. If a group of people would join *the HAL Educations*, after having done the HAL Progression Work, that portion of humans would be able to educate other humans in their surroundings to follow the energies of change.*

Important about the HAL Philosophy

The HAL Philosophy is not in any ways or forms, a continuation of any preceding philosophical, spiritual or religious systems. In most cases the HAL Philosophy disregards these systems.

But the essence in the ideas of moral and ethics are similar to that of other teaching systems, since all information given to humanity stem from the same concepts of the most optimal inter-relational human behavior that stretches back to the original humanities living in our solar system and how they arranged their civilizations, living amongst other human races and humanoid species to ensure common grounds.

Conversely, the HAL Philosophy is not just about inter-human relations or about humans living in an isolated environment as the only living species in our system, but about how humans are to behave in a solar system inhabited by other-dimensional humanities and humanoids along with being energetically connected to worlds beyond contemporary human understanding.

Therefore, the HAL Philosophy and the HAL Progression Work diverge from other, or similar, teaching systems due to the other-dimensional understanding, what a human is and how we can choose to progress all that we are, on an energetic level and on a consciousness level.

What is also to be noticed, is that the HAL Philosophy does not include any divine powers or godly creators in any ways or forms. Most of the old systems involve a cosmos founded by deities or a singular deity, from which humans are a creation to serve some sort of function of these creators. In fact, none of the old teaching systems incorporate a scientific conceptualization of higher order realities incorporated into a vast range of universes housing other human civilizations. On the contrary.

The HAL Philosophy approaches all ancient ideologies as constructions made by other-reality human races, living in adjacent worlds vibrating energetically unlike our world, or humanoid species having produced similar teaching systems as the means of control of humanity.

Because of this, the HAL Philosophy explanations, ideas and concepts, of why humanity should embark on a willed progression journey, are vastly different from that of other teaching systems.

The Essence of the HAL Progression Work

Progression is about taking full responsibility for all that we are and change what does not work, relative to what we want to become. It is also about facing the challenges of our lives, in this world, to get to where we are supposed to be and in that, reunite with the energetic standards and progression rate of our system.

The life we have, and our surroundings, show us where we are on the progression spiral and what we need to clear to gain the highest purity rate by unfolding the highest standards in what we exemplify, what we

The Emplacement 2020-2021

Randi Green © 2020

create and what we are. We do that to achieve the highest progression rate, which ensures an emplacement on the progression spiral according to our deeds, actions and achievements.

The inner and outer progression work focus on what is attainable and achievable to guarantee a better emplacement in the upcoming rounds of existence as well as the work to upgrade our current energy system and template, which will secure an even better emplacement in the next rounds, if we do both.

The HAL Progression Work is thus about making the ideal choices, following the guidelines of *the Principles of Progression*. It is about the ways we behave around other lifeforms, and how to obtain the highest standards by exercising *the Rules of Engagement* and finally the HAL Progression Work is about how we administer *the Natural Laws of Energetic Utilization* in our creations and manifestations of any form of energy. All sections are needed to reach the highest goals of progression.

To Summarize

- 1) *The HAL Philosophy* provides ideas of how to live a human life unfolding and living by the higher order awareness, all aimed at reuniting consciously with the progressive worlds and their advanced human civilizations.
- 2) *The HAL Progression Work* focus on the ethical and energetic behaviors we have, as contemporary humans in this world, to become the best version of a human we can be. It also entails the work of preparing our energy system and consciousness units for continued existence. The Principles of Progression, the Rules of Engagement and the Natural Laws of Energetic Utilization are our guidelines in this.
- 3) *The Timeline and Clearing Work* transform our energy system, template and the consciousness genetics. *The contemporary goal* is to upgrade these levels by achieving the highest purity rate on the bio-organic level in the ways we live, the highest standards on the energetic level in the ways we behave and the highest progression rate on the consciousness level. *The future goal* of our work is to match the requirements of the NGC. We do that by clearing out all disruptive timelines and our participation in these, as well as all dysfunctional energies and infected consciousness units.

More information will grow over the years, as the HAL Project is fully unfolded.
