## **The HAL Transition Class 1**

*In 2022, the sun begins its middle stages of its transition process into becoming a density 2 sun.*

*This offers a new opportunity in our energy and template work. That is, for those of us, who have prepared for this work and have gained the insight to begin the transition work with our energy system to meet up with the new requirements of our solar system. The preparation for this is the Progression and Clearing Work, outlined in the HAL Material books, classes and courses from the HAL Basic Energy Work and into the HAL Integration Classes 1-5.*

## **The HAL Transition Class 1**

The HAL Transition Class 1 looks at the DE2 Transition of our solar system and what that means for humanity. As well as what that means to our energy system and organic vessel. It also dives into the systemic changes. For us and for the races here. And much more.

The HAL Transition Class 1 is offered as a self-study. It works with the transitioning of our sun and us, and what is happening on a systemic level. The material consists of 17+ videos uploaded into a private group on Vimeo. The text material is delivered on email in PDF.

### **The First Set of Videos discuss the following Themes:**

- *What we know so far and what is to come after 2022.*
- *Can we do survive in a DE2 world of change?*
- *Where do the other races stand on this?*

### **The Second Set of Videos discuss the following Themes:**

- *What is the DE2 level of the timeline and template work?*
- *How do we work with the DE2 in our timeline and template work?*
- *What is there to learn now?*
