Overview of the Template Science Course 1

The idea is to continue the work that was instigated with the Restoration Program (the ATE Pillar Project) and the attempt to repair the original lineages of our reality. Of course, reality has changed since then (and the mission as such failed) and lots have been done to our template under the forces having their projects here, but to be able to reconstruct our template, using whatever viable genetics we have got left, we need the to understand the original construction first, why it was made and what its purpose was.

The HAL Transition Science Courses, the HAL Perception Logs and the Advanced Clearing Work Courses must have been completed, since they provide the background for this course. The course also builds upon earlier material, although taking it to the next level.

Included in the course material are 10 videos explaining the text material in details. One video from YouTube is included as well, since it provides background information for the class material.

The course material will be sent to you in the welcome email, along with access to the private Vimeo Group holding the videos.

The Template Science Course 1

Holds 10 videos and text material:

Content

- Sum Up Diagrams.
- What are the Template Sciences?
- The Original Pillar Project Developmental Programs.

The duration of all videos is between 35-55 min each.

The course starts out with an introductory video and then go into the HAL Template Science approach to the advanced work with the sciences behind the construction of the template. This specific template construction was developed in the Pillar Project in our solar system to accommodate for a higher order energy system suitable for the developmental programs unfolded within the Pillar Project. The template is thus unique for our solar system and the races here.
