## **Overview of the Template Science Course 2**

*We continue the work that was instigated with the Restoration Program (the ATE Pillar Project) and the attempt to repair the original lineages of our reality. The Template Science Course 2 starts out with background information for this level of work, and then go into the HAL Template Sciences where we round up the 4<sup>th</sup> cycle and the work with the vibrational field.*

We recall, that the energy system and template construction were developed in the Pillar Project in our solar system to accommodate for a higher order energy system suitable for the restoration program. With the call-outs of July 2022, this work is reaching its completion cycle and thus the original solar system humans are now working to move into the 2025 timeline, where we will continue our developmental work to the best of our abilities under the remaining restrictions of the invading races.

The HAL Transition Science Courses, the HAL Perception Logs and the Advanced Clearing Work Courses must have been completed, since they provide the background for this course. The course also builds upon earlier material, although taking it to the next level.

*Included in the course material are 10 videos explaining the text material in details.*

The course material will be sent to you in the welcome email, along with access to the private Vimeo Group holding the videos.
