Overview of the Template Science Course 3

In this course, we wrap up the sciences behind the template, the perception levels and how we work with these to rebuild the middle domain DE2 light body. We begin with the mental field and its transformational processes into the original mind-field and from there into the energy configuration that enables the activation of the upper template stored genetics.

We learn the highest function of the Principles, the Rules and the Laws as the tools to rebuild the MD light body and how the Principles, the Rules and the Laws apply to the generation of life force. And lastly, we look into the choices of entering the 5th dimension, and which, or engineering the 4th cycle orb leaving this reality.

The HAL Transition Sciences, the Advanced Clearing Work Courses and the Template Science Courses 1-2 must have been completed, since they provide the background for this series.
