Overview of the Course the Transformative Energy System

In this online course, we explore the DE1 Outer Domain Energy System, as it should look to enable us to connect to the LPRF1 Middle Domain in the LPRF DE2 section of the old networks and gridworks, belonging to the reality sector before the timeline event, and shortly after before it all were solidified into the LPRF2 type of regressed grids and networks under the regressed races. This left our LPRF1 Middle Domain dormant.

Included in the course material are 10 videos explaining the text material in details. Other relevant videos from the HAL Club Cycle 2 and YouTube are included as well, since they provide background information for the class material.

The course material will be sent to you in the welcome email, along with access to the private Vimeo Group holding the videos.
