THE HAL ACADEMY WEBINAR | SEPTEMBER 21ST 2024

The HAL Webinar on UAPs and the Interconnectedness to our Collective Awakening

The mystery of Unidentified Anomalous Phenomena (UAPs) continues to challenge our understanding of the multidimensional aspect of our universe and our role in the processes of advancement, we have in front of us. As humanity progresses, the quest to understand UAPs must be a significant part of our awakening processes, pushing the boundaries of what we know within science and consciousness expansion ideas.

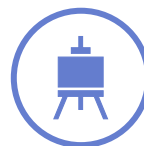

Awakening in a Nutshell

Awakening shows itself as a shift in awareness and overall perception of reality.

This process of realization brings about a new perspective on life, where we no longer operate within the limited concepts of self as part of the world, as it unfolds for most people.

This transformative process is marked by stages of self-discovery, inner progression, and a newfound understanding of the higher order reality beyond the physical form and personal identity.

Overview of Content

1. The Reality Field Resetting
2. The Future Aspect of Our Reality
